

If only it was this obvious

Don't let hidden moisture attack that new floor installation.

Substrate moisture vapor can turn a beautiful floor investment into an ugly nightmare. It may take a few weeks, or a few months. But when moisture attacks flooring from below, Mother Nature always wins.

So, win the moisture battle! Put your concerns to rest by specifying the installation of ARDEX MC Moisture Control System on any project with a substrate moisture problem.

Call us at 888-512-7339 for product information or to schedule a jobsite review.
