Architecturally Crafted Metal Crown Moulding

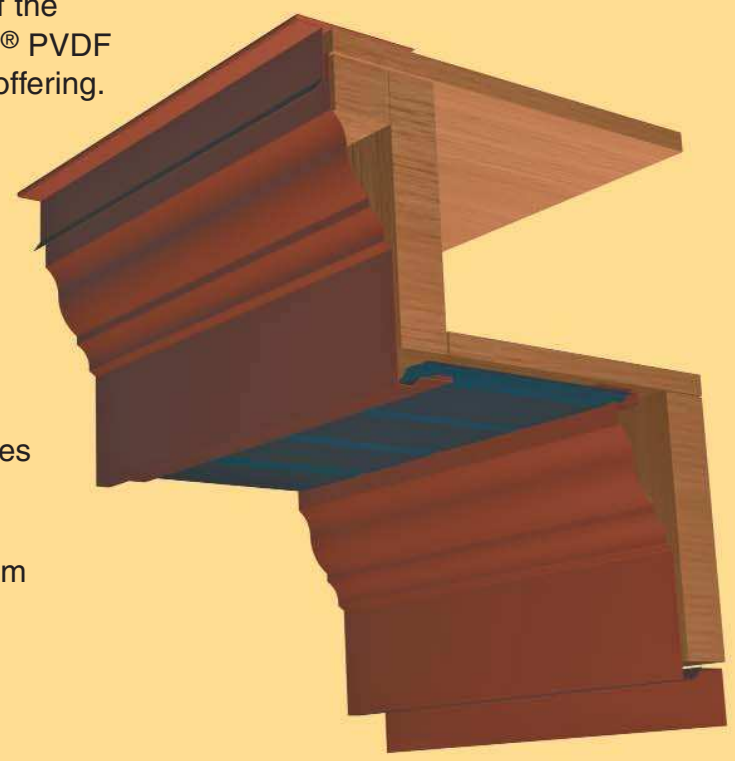

ATAS now offers the beauty of the past with the convenience of the present through unique and prestigious crown mouldings. The Crown Line of mouldings completes the rich colonial appearance of a home or building. Each trim is formed to look like colonial wood crown moulding, not the boxed-in look, often associated with aluminum trim. However, unlike wood, ATAS aluminum mouldings are virtually maintenance free. All mouldings are available in a variety of shapes and sizes.

The Crown Line can be produced from any of the 30 standard KYNAR 500® PVDF or HYLAR 5000® PVDF colors which complement ATAS's entire product offering.

Easy to install with templates and accessories available to create endless installation possibilities.

All Profiles:

- Are available in 30 standard ATAS colors
- Apply to gable ends, dormers, rakes and eaves
- Have seamless standard length of 12'-0"
- Are roll-formed from prepainted .032 aluminum
- Are designed to use with ATAS Wind-Lok™ soffit system
- Coordinate with all ATAS rainware (gutters, downspouts), flashing components and other roofing and wall systems

Other Advantages:

- Easy installation, saving time and expense
- Blind nailing eliminates need for exposed fasteners
- Eliminates time and cost of installing extra fascia on eaves
- Appropriate for commercial and residential applications
- Virtually maintenance free

* Wood Blocking needed for Support
