# CETCO

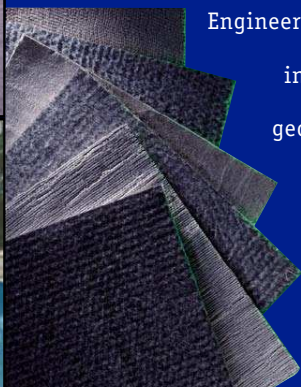

**CETCO is a diversified global environmental company providing innovative products and practical solutions to challenging regulatory and construction problems. We deliver a complete range of services built around engineering support, technical assistance, and leadership in research and development. With the strength of these services, CETCO is well-positioned to provide responsive solutions, on a global scale, to today's worldwide environmental compliance issues.**

CLAYMAX®

BENTOMAT®

TEXDRAIN®

## LINING TECHNOLOGIES

CETCO is the leading global producer of geosynthetic clay liners (GCLs) used in liquid and waste containment applications such as landfills, ponds, wastewater lagoons, mining leach pads, wetlands, and water supply channels. GCLs replace constructed clay liners and provide superior performance, increased installation speed, and lower total cost than clay.

Engineers and installers worldwide acknowledge CETCO's products as the most innovative and thoroughly researched GCLs available. We also provide geocomposites and geotextiles that are key parts of the system used in many different environmental lining and capping applications.

## BUILDING MATERIALS

For more than 40 years, CETCO's Volclay waterproofing products have garnered worldwide recognition for quality, performance, and reliability. Bentonite, a natural mineral, makes our products among the most environmentally friendly in the construction industry. CETCO's Building Materials Group (BMG) offers a complete line of below-grade waterproofing systems, waterstops, foundation drainage products, and roofing underlayments. CETCO's systems are the logical, cost-effective choice among architects, engineers, and contractors the world over.

## DRILLING PRODUCTS

Combining top-quality bentonite with the latest innovations in polymer science, CETCO's Drilling Products Group offers an array of products ranging from the widest assortment of high-quality drilling fluids, grouts, and sealants to performance-enhancing slurries, polymers and additives. A valued leader in product diversity, CETCO's experienced team of field engineers and research scientists offer drillers advanced technical support and continuous product development to meet the changing needs of this dynamic industry.

## OILFIELD SERVICES

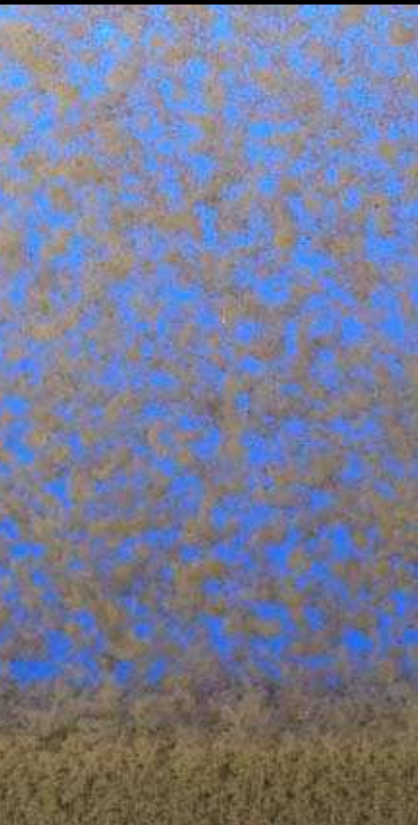

CETCO offers cutting-edge treatment technologies and professional services that allow offshore oil producers to achieve stringent overboard water-discharge criteria while maintaining efficient production. CETCO's service combines patented media technology, proprietary chemicals, and specialized equipment with highly-trained personnel to treat a variety of water-based fluids for discharge, re-injection or recovery. CETCO's well testing service complements offshore and pipeline services, enabling CETCO to deliver a more complete package to consumers.

RM 10®

ACCOFLOC®

SORBOND®

LIQUISORB®

## WASTEWATER TREATMENT

For over 30 years, CETCO has helped customers treat their wastewater with a comprehensive line of quality products and services aimed at meeting performance requirements consistently and cost-effectively. Our trusted RM10® line of products, liquid flocculants, coagulants, filtration media, and solidification and stabilization agents contain non-hazardous sodium bentonite clay, minerals, polymers, and other proprietary materials. These products allow a safe, simple, and economical means for pre-treatment and disposal.
