Prices of Freight Costs

Unless otherwise indicated, prices shown on Seller's price list are for less than truckload quantities. The minimum truckload quantity is 24,000 pounds. Prices are subject to change without notice and are based on full carton quantities. Prices shall be those in effect at time of shipment of Products.

Seller shall grant Purchaser a freight allowance on all orders of 12,000 pounds or more for a single shipment to a single destination. The allowance shall be based on the lowest rates currently in effect from actual shipping point to destination point or nearest port of export. In no event shall the allowance be greater than the actual freight cost of a specific shipment. Purchaser's request for costlier means of shipment will be honored, but Purchaser shall be liable to Seller for the additional freight expense. Purchaser "will-call" orders at Seller's plant warehouse shall not be entitled to allowance.

All taxes, tariffs, duties or similar charges paid by Seller imposed or levied by any governmental authority in connection with the purchase, shipment, import or export of Products purchased or in connection with the procuring of materials used therein may at Seller's sole option be added to the price of Products so affected. Additional shipping charges for Products paid by Seller such as destination, storage, labor and redelivery and special or extra expenses for handling air freight, bus or other shipments may also, at Seller's sole option, be added to the price of such Products.

If, in Seller's sole opinion, the financial condition of the Purchaser so warrants, Seller may require advance payments or satisfactory security. In the event that the Purchaser fails to make such advance payments or furnish such security upon Seller's request, delivery of Products may be suspended without further Seller obligation.

Seller may, at Seller's sole option, require payment by means of an irrevocable letter of credit opened and confirmed by a bank or banks acceptable to Seller and upon terms and conditions acceptable to Seller.

All authorized returns are subject to a 20% restocking charge. Seller will only issue credit for Service Level "0" material received at the designated company facility with the Return Goods Authorization appearing on the material, and after being inspected and determined by Seller to be in resalable condition. Purchaser is solely responsible for arranging and prepaying for all return freight.
