

HIGH PERFORMANCE FINISHES AND COATINGS

More and more architects, contractors and building owners around the world are relying on Dryvit finishes and coatings to deliver high performance protection and lasting beauty they demand. Whatever the building type, new construction or remodeling, there is a Dryvit product that provides the durability they are looking for. And, Dryvit Systems, Inc. is certified to ISO 9001:2000 standards, the worldwide common denominator for product consistency and excellence. This certification helps identify Dryvit as the recognized leader in finishes and coatings technology.

What's more, Dryvit standard, specialty and elastomeric finishes, as well as coatings, offer low maintenance advantages such as DPR (Dirt Pickup Resistance) and PMR™ (Proven Mildew Resistance). Dryvit presents a wide range of custom colors and textures for any architectural style on new or retrofit projects – all with written Dryvit materials warranty.

For Application over a Range of Substrates

Dryvit finishes are ideally suited to provide a protective and decorative coating over masonry, stucco, concrete, CMU and EIFS substrates. A variety of textural effects may be specified depending on the Dryvit finish selected and the application technique employed.
