Protecting Your World from the Elements™

February 9, 2006

To whom it may concern,

The recycled content of Jumbo Tex® weather resistive barrier papers varies from grade to grade and from batch to batch. The paper suppliers to Fortifiber® Corporation utilize post-consumer recycled fibers (commonly referred to as "OCC") as well as virgin fibers from wood chips in their processes. The percent of OCC fiber in the paper we use to manufacture Jumbo Tex, along with a product total "recycled content" is shown below.

	Paper OCC PCT	Recycled Total PCT
Jumbo Tex	38 – 46%	29 – 35%
Jumbo HD 30 Minute	38 – 46%	27 – 33%
Super Jumbo Tex 60 Minute	14 – 20%	9 – 14%

Thank you for your continued support of Fortifiber Building Systems Group products.

Sincerely,

Dave Olson
Technical Services Manager
