

Technical Bulletin No. 2

APPLICATION TEMPERATURE RECOMMENDATIONS

PRODUCT GROUP	RECOMMENDED STORAGE TEMP.		REQUIRE APPLICATION TEMPERATURE RANGE
	MIN	MAX	
Water Based Emulsions	50°F	100°F	*40°F and rising
Solvent Based Adhesives	50°F	100°F	*40°F and rising
Solvent Based Coatings Cements	50°F	100°F	*40°F and rising
Epoxy Coatings	50°F	100°F	*45°F to 110°F
Coal Tar Based Coatings	50°F	100°F	*40°F to 110°F

* The substrate, the product and the ambient temperatures must be above minimum temperature.

** Application at temperatures lower than 40°F. will become difficult, due to the increase in viscosity that occurs when the product's temperature is lowered. Application of products at or below freezing temperatures could result in adhesive failure, unless special precautions are taken to insure that the surface is free of moisture and/or ice crystals.
