

Miracote Microtopping: a big hit with Canadian chain of stores

Back awhile ago, one of the reps for the Federated Co-op chain of stores attended a Miracote/Microtopping training seminar that Crossfield Products presented in Canada. The rep was very impressed with the look of the Microtopping and made the recommendation to have it specified on a new store being built in Brooks, Alberta. Federated Co-op supplied color chips which Crossfield custom matched, and Crossfield's technical experts worked with the Miracote applicator to complete the job.

Federated Co-op has been very impressed with the results and have since specified several other stores. Microtopping has provided Miracote applicators an opportunity to expand from seasonal to year-round work.
