

THREE SMALL STEPS FOR YOU ONE GIANT LEAP FOR SUPERIOR WINDOW INSTALLATION

1

SEAL

TeQ::Seal™ provides a waterproof bond even in cold weather.

2

FLASH

TeQ::Flash™ covers the seal, enhancing water protection.

3

FOAM

TeQ::Foam™ offers better water and moisture resistance than most expanding foams.

With an estimated 10,000 mold and mildew claims annually, you can't afford to mix and match window installation products. You need to be sure each and every part will work together to protect against the elements.

The new OSi® WINTeQ™ Window Installation System does just that. Three compatible products form the ultimate barrier against water intrusion, while also providing a more energy efficient installation and lower energy costs. Stop piece-mealing your window installations and get the complete system – OSi® WINTeQ.
