Hat Furring Channel

Product Benefits

Phillips Hat Furring Channels are fabricated from galvanized steel used as cross furring members for attachment of gypsum wallboard or lath on ceiling or furred masonry walls. Phillips hat channels feature many benefits including but not limited to:

- Knurled face for positive screw location and to eliminate wandering
- Available in 25, 22 and 20 gauge
- 25 gauge features hemmed edges
- 7/8" and 1-1/2" available
- Works great with industry sound clips

Certification

Phillips Hat Furring Channels meet or exceed ASTM A 653 Standard Specification for Steel Sheet, Zinc-Coated (Galvanized) or Zinc-Iron Alloy-Coated (Galvannealed) by the Hot-Dip Process.

Storage

Avoid bending or other damage and store in a dry place protected from moisture.

Installation Recommendations

Phillips recommends installation in accordance with applicable ASTM standards and using prevalent industry standards. For allowable ceiling span, please see SSMA Product Technical Information catalog. Additional reference materials include ASTM C 754, Gypsum Association GA-216, Gypsum Association GA-600, SSMA and Phillips Manufacturing's website (www.phillipsmfg.com).
