**USG has long supported sustainable building by emphasizing innovation. Visit our new web site to learn more about the advantages that let you choose USG ceilings with confidence.**

### Sustainability

- USG products that can help qualify for LEED® credits.
- How architects create structures that require fewer natural resources to build, maintain and adapt to future uses.
- Interviews with industry experts.
- A timeline of how ideas about climate change have evolved, FAQs about sustainability, and a glossary.

### Indoor Environmental Quality

- Zero-, low-emitting ceiling tiles.
- Superior performance antimicrobial protection.

### Recycling

- USG ceiling panel recycling program.
- How USG products are made with recycled and renewable materials and responsible manufacturing processes.
