## **Welcome Grace Construction Products!**

BuildSite is delighted to welcome Grace Construction Products to BuildSite Channel Communications.

Channel Communications, BuildSite's special program for leading construction product manufacturers, responds to customer requests for more detailed product information delivered at the time of purchase. Grace has purchased two components of Channel Communications, Product Match and Systems.

Product Match says a product is "right for the job." Grace is using Product Match on Bituthene, Vycor, Hydroduct, Perm-A-Barrier, Preprufe, and Procor. Messages on Bituthene 4000, for example, include "self-adhesive waterproof membrane with super tacky adhesive compound" and "packaged with patented water-based conditioner."

Grace is using Systems for Bituthene, Perm-A-Barrier, Preprufe, and Procor. Systems shows all the components that go with a major product – surface treatments, sealers, terminations, and drainage. Systems are available to BuildSite subscribers.

BuildSite once again extends a warm welcome to Grace Construction Products as they join a growing list of leading manufacturers in Channel Communications.
