

## Visit BuildSite at Greenbuild Booth 5345!

---

We are excited to announce that Greenbuild 2009 will be the site of the official release of BuildSite Green Data, our next-generation LEED® and environmental database. Enhancing our industry-leading technical database of 20,000 products, BuildSite Green Data extracts product-specific LEED attributes such as VOC content, recycled material content and manufacturing location. These values have been entered into our searchable, sortable technical database, helping our customers achieve LEED submittal requirements.

[Find out more about BuildSite Green Data](#)

Please visit us at **Booth 5345** to see a demo of Green Data and to meet our team.

### About BuildSite:

BuildSite provides an online product, technical, procurement, and green product database to the construction industry worldwide. BuildSite features over 20,000 products from more than 300 manufacturers, along with a Distributor Directory of over 700 locations. BuildSite also offers software tools for construction submittals, allowing data from the supply chain to flow into project management and 3D Building Information Management (BIM) design models. BuildSite Green, a next generation database of environmental and LEED® data for construction products, will include online submittal templates tied to the requirements of the US Green Building Council. Visit BuildSite at [www.buildsite.com](http://www.buildsite.com).
