About BuildSite:

BuildSite provides an online product, technical, procurement, and green product database to the construction industry worldwide. BuildSite features over 20,000 products from more than 300 manufacturers, along with a Distributor Directory of over 700 locations. BuildSite also offers software tools for construction submittals, allowing data from the supply chain to flow into project management and 3D Building Information Management (BIM) design models. BuildSite Green, a next generation database of environmental and LEED® data for construction products, will include online submittal templates tied to the requirements of the US Green Building Council.
