

# BuildSite Submittals

## Integrating Product Data with Project Management and Design

Submittals play a key role in every project. They can also be a big time sink for the project team. BuildSite Software frees up your project managers, engineers, and estimators and gives you a fully electronic project record.

Package#	Item#	Section	Sub Section	Product Specified	Product Submitted	Documents Submitted	Notes
3300-001	1	3300	2.2 C	Forms for Cylindrical Columns	<a href="#">Sonotube@ Commercial Concrete Forms</a>	<a href="#">Product Data (3 pg, 3832 kb)</a>	Recycled material
3300-001	2	3300	2.2 E	Void Forms	<a href="#">Sonotube@ Void Forms</a>	<a href="#">Product Data (4 pg, 403 kb)</a>

3300-001	4	3300	2.2 I	Form Ties	<a href="#">A-3 Standard Snap Tie</a>	<a href="#">Product Data (1 pg, 59 kb)</a>	
3300-001	5	3300	2.2 I	Form Ties	<a href="#">A-8 Waterseal Washer</a>	<a href="#">Product Data (1 pg, 40 kb)</a>	Used below grade only

Create paperless submittals, tied line by line to specifications.

### Search our industry-leading database of over 20,000 products

BuildSite's comprehensive database of product and technical information provides access to hundreds of manufacturers in one easily searched location.

### Create electronic submittals that tie—line by line—to the specs

Online templates for product data, shop drawings, mix designs and LEED submittals allow the user to generate a Submittal Table of Contents. The result is a complete submittal package in electronic form.

### Top Features

Search over 20,000 products from more than 250 manufacturers in 850 categories

Find product data, MSDS, Installation Details, and complete product systems

Create paperless submittals tied to the specs

Post packages to a URL

Integrate with design and project management software

Share your submittal with the entire project team

## PRODUCT SNAPSHOT

**Bituthene 3000 Product Details**

Manufacturer: Grace Construction Products  
Category: [07130-C - Sheet Waterproofing - Modified Bituminous Sheet Waterproofing](#)  
Description: Self-adhesive, rubberized asphalt/polyethylene waterproofing membranes for plaza and parking decks  
Features:

- Fully-Adhered Sheet Waterproofing Membrane
- Self-Adhesive Laps assures continuity
- RIPCORD Split Release on Demand for fast application
- Flexible: Accommodates minor settlement and shrinkage movement

Find a local distributor. Enter your U.S. zip code:

**Product Documents** Pkg+

Product Data - Above Grade Waterproofing (235 Kb, 4pg)	<input checked="" type="checkbox"/>
Product Data - Below Grade Waterproofing (152 Kb, 4pg)	<input type="checkbox"/>
MSDS (114 Kb, 6pg)	<input type="checkbox"/>
Spec Data (91 Kb, 6pg)	<input type="checkbox"/>

**System Package**

- Surface Treatment
  - [Bituthene Primer WP-3000](#)
    - Product Data (117 Kb, 2pg)
    - MSDS (250 Kb, 5pg)
  - [Bituthene Primer B2](#)
    - Product Data (131 Kb, 2pg)
    - MSDS (303 Kb, 9pg)

Add items to the package.

### Find the information you need from over 20 document types

Check off the documents you need to complete the project. Choose among product data, MSDS, installation details, testing reports, green data and many others. Easily upload warranty and application letters and other non-BuildSite documents.

### Integrate electronic submittals with the latest construction software

Submittals from BuildSite integrate directly with project management software— simply paste the submittal's unique URL into your submittal register. BuildSite Submittals also allow you to attach product data to design objects in Building Information Modeling (BIM) software. You can associate concrete chemicals, roof and waterproofing membranes, insulation, drywall, firestopping, fasteners, adhesives, and sealants with 3D design objects for floors, walls, and roofs.

### Share submittals with your project team

By posting your submittal to a unique BuildSite URL, you can share it in real time with the entire project team. Approvals and revisions, as well as register entries, flow easily through project management software.
