

DECKING

Deck designers and builders are smart people; we can make a difference one project at a time. Our decks should be designed to have longer life cycles. We should embrace innovation of the materials we use. You may say to yourself that one person can't make a difference. But we should all be reminded that if we are not part of the solution then we become part of the problem. We don't live in isolation. Our actions collectively will have a huge impact on the environmental situation on Earth.

WESTERN JUNIPER

"Restoration" Juniper decking

LONG LASTING!

Western Juniper is the most rot resistant species of wood in the Pacific North West! Western Juniper has a 30+ year life span, in ground, without chemical treatment! We have spoken to ranchers that claim to have field posts in the ground for over 50 years!!! No other untreated wood post can compare!

...Check out this [OSU article on Juniper](#)

Organic!

When used in ground it requires no preservatives. Perfect for vineyards, gardens, plantations and other organic applications where chemical treatment is not an option.

WESTERN RED CEDAR

FSC Western Red Cedar (*Thuja plicata*)

is one of North America's great renewable resources. Slow growing and naturally durable, Western Red Cedar has one of the longest life spans of any North American softwood. It produces long lengths of timber with true, straight grain. It is free from pitch and its heartwood has natural decay resistance. Its low density gives it an insulation value superior to most other species. Light weight, easy to work, easy to finish, possessing outstanding dimensional stability, Western Red Cedar is a preferred wood for nearly all purposes where attractive appearance or resistance to weather is important.

FSC Tropical Hardwoods

FSC Garapa

Garapa (also known as Apuleia Leiocarpa, Brazilian Ash, Grapia, Amarealao, Marotoa, Muiratua, Muirajuba) is one of the finest quality hardwoods available that features a fine-grained timber that is light yellow to a warm golden hue. Garapa is an exotic hardwood that is naturally resistant to rot, decay and insect attack. Garapa is naturally scratch resistant which allows the surface to remain smooth for many years, making Garapa an perfect wood for exterior decking. Garapa offers a 25+ year lifespan without preservatives! Our Garapa decking is responsibly harvested from managed forest to provide a truly renewable resource. Garapa is comparable to Ipe and is available at a fraction of the cost. We ship our Garapa decking products direct to your home or job site.
