The Wrap Cap Screw for Commercial Steel Stud Applications

GENERAL DESCRIPTION & APPLICATION

• A full drill point screw with an attached 2” plastic cap for use in steel stud applications (12 gauge to 20 gauge)
• Recommended for fastening any Tyvek® product—ideal for commercial applications
• Wrap Cap Screws with a 2” plastic disc reduce the potential for jobsite blow-off of wrap—delivering increased fastener holding power over traditional 1” plastic and metal caps

FEATURES / BENEFITS

1 3/4 Steel Stud Screw

• Can be applied by hand or drill
• Self-tapping drill point screw, #8 shank with a modified truss head style (Phillips head)
• Screws are coated with an organic fluoropolymer for improved rust protection
• Drill bit included in each box, for ease of installation
• Screws are ore-attached to Wrap Caps for quick installation

2” Wrap Cap

• Constructed of high-density polyethylene with UV inhibitors
• Large diameter cap increases faster holding power—reducing the potential for job-site blow-off of wrap
• Large plastic cap provides additional protection around faster penetrations
• Large diameter cap permits easy handling and installation

WHY USE A TYVEK® WRAP CAP WITH A SCREW?

Quality contractors and installers have been asking for an easy way to secure Tyvek® products to steel studs. They also asked for increased holding power.

We designed the DuPont™ Tyvek® Wrap Cap Screw as the solution for quality commercial and steel stud installations.
