Liberty™

SBS Self-Adhering Roofing System
EZ-Installation Kit

Description

Liberty™ EZ Installation Kit is a convenient combination of everything you should need to complete small roofing projects using Liberty™ Self-Adhered Roofing Membranes. The kit includes application instructions and just enough primer and flashing cement to install a typical 200 square foot project such as a porch, car port or shed.

The Liberty™ EZ Installation Kit contains:

- 1 – One gallon Bucket of Matrix™ Asphalt Primer.
- 4 – 11.5 oz tubes of Matrix™ SBS flashing cement.
- 1 – Liberty™ installation CD.
- Liberty™ Self Adhering Roofing installation instructions.

Uses

Matrix™ Asphalt Primer is suitable for use on plywood and metal surfaces to help assure adhesion of the membrane to the deck and metal flashing components.

Matrix™ SBS flashing cement is used at the end lap to assure the lap is properly sealed whenever applying the Liberty™ Cap over another granule surface.

Installation rates for both Asphalt Primer and SBS Flashing Cement vary. See detailed Liberty™ Self-Adhering Membrane installation instructions or specific product data sheets for detailed information.

Advantages

- **Convenient...** No waste on small projects.
- **Makes Installation Easier...** No guessing on what else you may need.
- **Easy To Follow Instructions...** For the non-professional.
