

PRODUCT & ESTIMATE GUIDE #HMS-[100] [107] or [307]

Asphalt Emulsion Roof Coatings

			Application Rate / Gallon 100 ft. ²			Spray Equipment		h	=		
Product ASTM			Varies by surface roughness & porosity				Required psi	Tip Size	Brush	Roll	
#100	ElastoMulsion®		late of	Quality	Quality		Monolithic: (107 or 100) 9 Gallons		.036 .080	ok	No
#107	Asphalt Emulsion	D1227 Type III, Class 1	Interply With Polyester 4	Coating Smooth Surface: 4 to 5	Coating Granule Surface: 4 to 6	Bonding Granules: 3½	With 3# Chopped glass #189	500 to 1500	.035 #30	ok	No
#307	Fibered Emulsion	D1227 Type II, Class 1		100			N/A		.050 #10	ok	No

WHEN TO COAT THE ROOF:					
GOOD	BETTER	Best			
Apply protective coating in 5th to 7th Year	Apply protective coating in 5th year	Apply protective coating on new roof the 1st year			
 GENERAL Power wash surface (use pressure of a build up of dirt, grease and other foreig phosphate (TSP¹) and water. Rinse the Repair defects: Splits, cracks, ridges, I cracked metal edging and any other de roofing system. See Henry Repair Gu Test drains before start of work and age are running freely. Read product data completely. Do not allow emulsion to freeze. Observether conditions into consideration a within 48 hours following application. Do not apply asphalt primer when coater For best results reinforce valleys, water layer of 107 emulsion and 196 polyest Asphalt-based products form a small a they weather. Normally not noticeable Roofs with poor drainage will accentua water soluble material in low spots. The coating. If there is no rainfall, hose the solubles. 1 - Check with local municipalities for any lim Some TSP substitutes are not effective or solution. 	an matter with solution of tri-sodium boroughly. arge blisters, deteriorated flashings, effect affecting waterproofness of the ide. Allow to cure as required. Jain at completion to make sure they erve weather limitations. Take at time of application as well as ting roof with emulsion. erways and alligatored surfaces with er. Allow to cure. Imount of water soluble material as because rain washes it away. It the problem by concentrating the is can degrade the aluminum se roofs to remove the water initations on use of TSP.	 Helpful Tips - For best results spray apply coating. Can also be applied by brush. Roller applications not recommended. Emulsion is thixotropic so can appear to be too thick. If using pails, use a long stir stick and cut a figure 8 through the material. This allows you to more easily pour the material onto the roof. Material will further liquefy when brushing the material over the roof surface. Surface may be damp, but not wet. Temperature must not drop below 50 F. during application or drying time. Do not apply if rain is expected before product is dry. Dry time will vary by temperature and humidity. Hose down building walls and grounds adjacent to spray area to avoid damage to building and grounds in the event of overspray. Use Stretch film to protect roof top units. Immerse brushes and tools in water when not in use and for easier clean-up. 			

<u>GUIDE SPECIFICATION #HMS-[100] or [107] or [307]]</u>

- 1. PREPARATION
 - a. Power wash all surfaces. Scrub out build up of dirt and grease.
 - b. Repair defects in the roof membrane and flashings per Henry Roof Repair Guide.
 - c. Protect adjacent walls not scheduled for coating. Protect equipment, roof top units, etc. from overspray. Reinforce valleys, badly alligatored surfaces and areas that pond water with a layer of #196 polyester embedded in 4 gallons of #107 emulsion and and surfaced with 3 gallons of #107 emulsion.
- 2. EMULSION APPLICATION
 - a. Over prepared dry or damp roof surface, apply a uniform layer of #____asphalt_emulsion using a brush or spray equipment at the rate of _____ gallons per 100 ft.²
 - b. Spray base flashings and other designated surfaces.
- 3. REFLECTIVE COATING (optional)
 - a. Over prepared dry or damp surface apply #_____ Aluminum Coating at the rate of ______ /gallons per 100 ft.² in one coat.
 - b. Any areas that peel must be redone before the project will be considered complete.
