MAPEI has the resources to provide architects, builders and contractors with “Total Solutions” for all tile and stone projects. A total solution provides a single-source system – from surface preparation and concrete restoration through the installation of floor coverings. MAPEI systems are also guaranteed and compatible with approved specified flooring manufacturers.

MAPEI is the powerhouse of tile and stone installation systems. MAPEI’s mortars, grouts and caulks are in widespread use and especially valued for installations where extreme temperature conditions pose concerns, and where fast-track construction is required.

MAPEI carries adhesives and mortars for all tiles and stones, whether ceramic, porcelain, glass, marble, granite, slate or limestone, composite or agglomerate. An extensive line of grouts and color-matched caulks completes the installation systems.

MAPEI is a unique company. It has transformed from an enterprise of the Italian craft tradition in Milan, Italy, into a global scientific and technological leader in its industry. Today, around the world, MAPEI is working hard to make the best and most useful products for you!

MAPEI remains a leader in tile & stone installation systems through its ongoing commitment to the following principles:

Keeping scientific research at the forefront

Worldwide, 12% of MAPEI employees work in research & development, making technologically superior products and quality service available to customers.

To stay on the cutting edge of innovation and one step ahead of the competition, MAPEI reinvests 5% of its annual sales revenue into research & development of new products. MAPEI’s worldwide labs work on more than 150 new projects each year.

Finding solutions to our customers' challenges

MAPEI's technical experts are highly equipped to propose solutions to any jobsite problem, working with R&D to custom-design products and systems to meet the most challenging construction needs.

MAPEI's Technical Services team is committed to helping resolve technical problems. It provides prompt telephone response to customers seeking urgent technical advice including: planning project installations, troubleshooting problems, reviewing product claims and conducting specialized product testing as needed.

Developing environmentally friendly products

At MAPEI, concern for the environmental impact of products is a fundamental part of its philosophy, corporate commitment and responsibility. MAPEI utilizes recycled materials whenever it is practical. For example, more than 20% of *Ultralite Mortar*™ (MAPEI's state-of-the-art lightweight mortar) comes from recycled raw materials. Since 2001, MAPEI has been a member of the U.S. Green Building Council, which focuses on sustainable and recyclable building processes as well as environmental and internal air-quality issues.

MAPEI's environmental commitment can be seen with the development of its innovative BioBlock™ technology. For more than 5 years, MAPEI has been building this technology directly into select products to help protect them against mold and mildew.

Following the strictest international standards for quality

MAPEI is devoted to ensuring continuous improvement in quality products and services as it works toward achieving the most comprehensive and demanding International Organization for Standardization (ISO) certification for all of its American facilities.

Remaining an active member of industry organizations

Surface Preparation Products

ISO 13007 Standards Product Classifications

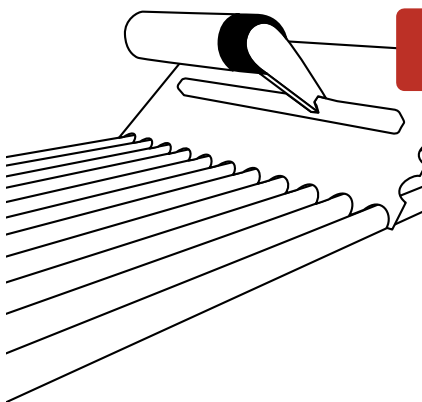

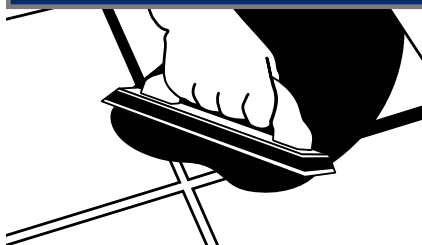

Choosing the right materials can be puzzling

Let MAPEI put the pieces together

The tile and stone installation industry has entered a new age that is bringing simplicity and consistency to the architect's task of specifying the right product for the right job. The new ISO 13007 Standards for Adhesives and Grouts make it easier for architects to describe what characteristics they want in the installation products they select for use under the conditions affecting each particular project. The objectivity that architects can now include in their specifications will reverberate through the entire installation network.

The ISO 13007 Standards employ a classification coding system of letters and numbers that indicates to architects, contractors, installers and distributors exactly which adhesive and grout performance requirements must be met for a particular job. MAPEI is displaying the coding on its packaging and literature so customers can easily see which product(s) they should purchase to meet their needs. The chart on the next page demonstrates the ease of using this coding system.

Example: **Granirapid**® System (C2FS2P2)

Adhesives		TYPES	CLASSES	SPECIAL CHARACTERISTICS
	C = Cementitious (Thin-set mortars)	1 = Normal 2 = Improved	<ul style="list-style-type: none"> F = Fast-setting T = Slip-resistant E = Extended open time S1 = Deformable S2 = Highly deformable P1 = Plywood adhesion P2 = Improved plywood adhesion 	
	D = Dispersion (Mastics)	1 = Normal 2 = Improved	<ul style="list-style-type: none"> F = Fast-drying T = Slip-resistant E = Extended open time 	
	R = Reaction resin (Epoxies)	1 = Normal 2 = Improved	<ul style="list-style-type: none"> T = Slip-resistant 	
Grouts		TYPES	CLASSES	SPECIAL CHARACTERISTICS
	CG = Cementitious grouts	1 = Normal 2 = Improved	<ul style="list-style-type: none"> F = Fast-setting A = High abrasion resistance W = Reduced water absorption 	
	RG = Reaction resin grouts	-	Higher performance characteristics than improved cementitious grouts

Granirapid System =  +  + 

Index to technology logos

MAPEI supports the new ISO 13007 Standards for adhesives and grouts. This forward-thinking classification system establishes performance-based global standards for the tile-setting industry.

MAPEI's FastTrack Ready products reduce the required steps of an installation and/or perform more quickly than current technology.

Select MAPEI products for tile and stone installation feature High-Hydrated Cement Technology, offering high early strength, excellent workability, ultra fast curing, unmatched long-term durability and efflorescence-free curing.

MAPEI's BioBlock technology has been added to select products to help protect them from mold and mildew.

Products developed with MAPEI's "green innovation" are LEED-compliant, helping to contribute valuable points toward LEED-certified projects.

Dust-Free Technology reduces dust by up to 90% during the pouring and mixing of cementitious products, while contributing to a cleaner jobsite.

Mapecem® Premix

Fast-Setting, Pre-Blended Mortar Mix

Mapecem Premix is a fast-setting, premixed cement-based mortar for concrete repairs and subfloor preparation work. Mixed exclusively with water, Mapecem Premix provides an easy-to-use, high-compressive-strength, fast-setting mortar that sets completely within 24 hours without shrinkage cracks. When properly used, Mapecem Premix will allow installation of ceramic tile and natural-stone flooring after only 3 to 4 hours and installation of floor covering (such as vinyl, wood, rubber, linoleum and carpet) after 16 to 18 hours.

Mapecem®

Fast-Setting Binder for Repair Mortar and Concrete

Mapecem is a high-performance, shrinkage-compensated binder that is added to select aggregates with water to create a fast-curing, high-strength interior repair mortar and topping. Aggregate must be added to this product before placement. See the Mapecem Technical Data Sheet for aggregate mixing ratios and application thickness.

NEW

Mapelath™

Synthetic Lath

Mapelath is a lightweight, noncorroding, alkali-resistant synthetic lath used as a substitute for traditional metal lath. It is lighter and easier to work with when installing tile over existing vinyl or other approved substrates.

Ultra SkimCoat™

Premium Fast-Drying, Cement-Based Skimcoating Compound

Ultra SkimCoat is a high-performance, rapid-setting, cement-based skimcoating compound for the finishing and smoothing of dry concrete, approved wood underlayments, properly prepared ceramic tile and nonwater-soluble adhesive residues. Use for skimcoating unfinished, nonlevel, rough-textured concrete and wood underlayments; for preparing and leveling wood-underlayment seam joints; for skimcoating over properly prepared ceramic tile; and for skim-coating well-bonded, nonwater-soluble adhesive residues.

Planiprep™ RS

Professional Trowelable Underlayment

Planiprep RS is a sanded, cement-based, polymer-modified, fiber-reinforced rapid-set patching compound designed for fast-track repairs. Use Planiprep RS to fill trenches, deep voids and holes quickly. Planiprep RS can be applied from featheredge up to 4" (10 cm) thick in a single application, making it perfect for the creation of ramps and other deep-repair projects. Easy to mix and apply, Planiprep RS can be applied using a steel trowel over small or large areas.

Planipatch®

Fast-Setting, Polymer-Modified, Cement-Based Patching Compound

Planipatch is an ultra fast-drying, self-curing, polymer-modified, cement-based patching compound that rapidly develops high compressive strength. Use for smoothing, patching and filling cracks, holes, voids and depressions in concrete and approved wood underlayment before the installation of floor coverings. Floor coverings can be installed just 1 hour after application. Mix with *Planipatch Plus™* to use as an embossing leveler or patch over properly prepared vinyl sheet goods, vinyl composition tile (VCT), cement terrazzo and residual cutback adhesive surfaces.

Planipatch Plus™

High-Performance Additive for *Planipatch*®

When *Planipatch* is mixed with *Planipatch Plus*, the *Planipatch Plus* System can be used as an embossing leveler or as a patch over properly prepared vinyl sheet goods, vinyl composition tile (VCT), cement terrazzo and residual cutback adhesive surfaces before the direct glue-down installation of floor coverings. Mix diluted *Planipatch Plus* (1 part additive to 3 parts water) with *Planipatch* for use in thin applications over porous and dry concrete.

Planibond® EBA

Epoxy Bonding Agent and Primer

Planibond EBA is a two-component, multipurpose epoxy bonding agent and primer. *Planibond EBA* is nonshrinking, 100%-solids and moisture-insensitive. (Note: This is not a moisture-reduction barrier coating.) *Planibond EBA* is used primarily as a primer for MAPEI self-leveling materials, and as a bonding agent for screeds and repair mortars, with applications for corrosion protection and crack repair. *Planibond EBA* meets ASTM C881 requirements. *Planibond EBA* is a structural adhesive for properly prepared concrete, masonry, metal and wood surfaces.

Primer WE™

Water-Based Epoxy Primer

Primer WE is a two-component, polymer-modified, solvent-free water-based epoxy primer for enhanced adhesion to nonporous substrates before the application of MAPEI self-leveling materials. When mixed, *Primer WE* is purple for easy identification. It improves adhesion over smooth, nonabsorbent and difficult-to-bond-to substrates such as properly prepared ceramic tile, cement-based terrazzo, old cutback adhesive residue and approved plywood subfloors.

Primer L™

Advanced-Technology Acrylic Latex Primer for Concrete

Primer L is a concentrated, solvent-free acrylic primer used before the installation of underlayments and topping materials. It is green for easy identification. *Primer L* improves the bond between a properly prepared and profiled concrete substrate, and self-leveling underlayment or topping materials. Surface must be mechanically profiled and prepared when using this primer.

Planicrete® AC

Acrylic Latex Admixture for Mortar and Concrete

Planicrete AC is a one-component, concentrated, liquid latex admixture used to enhance the performance of cementitious repair mortars, plasters, stuccos, concrete mixes and toppings for the restoration of horizontal, vertical and overhead concrete; concrete masonry units (CMUs); and masonry surfaces. It is used as an admixture in all cement-based masonry mortars, stucco, sand and cement repair mortars, and any other cement-based material to improve adhesion and reduce permeability. *Planicrete AC* also will increase compressive, flexural and tensile strengths. When mixed with Portland cement, *Planicrete AC* also can be used as a slurry bond coat for concrete.

Ultraplan® Easy

Easy-Preparation, Fast-Setting, Self-Leveling Underlayment

Ultraplan Easy is an HCT™ (High-Hydrated Cement Technology)-based, quick-setting, self-leveling underlayment that typically requires only a clean, soundly bonded substrate before application. Typically requiring reduced surface preparation, *Ultraplan Easy* provides lower installation costs and fast turnaround on jobsites. It features high strength and is ready for tile in 3 to 4 hours.

NEW

Novoplan® Easy

Easy-Preparation, Self-Leveling Underlayment

Novoplan Easy is a high-strength, self-leveling cement-based underlayment and repair mix for interior concrete and engineer-approved floors. It typically requires reduced surface preparation and only a clean, soundly bonded substrate before application. *Novoplan Easy* provides low installation costs and fast turnaround on jobsites, allowing flooring installations in as little as 12 hours.

Ultraplan® 1 Plus

High-Performance, Quick-Setting, Self-Leveling Underlayment

Ultraplan 1 Plus is an HCT™ (High-Hydrated Cement Technology)-based, quick-setting, self-leveling, self-drying underlayment and repair mix for interior concrete and engineer-approved floors. High-strength and abrasion-resistant, *Ultraplan 1 Plus* is ready for tile in 3 to 4 hours and vehicular rubber-wheel traffic after 3 days.

Mapelastic™ AquaDefense

Premium Waterproofing and Crack Isolation Membrane

Mapelastic AquaDefense is a premixed, flexible, thin, ultra fast-drying waterproofing and crack-isolation membrane for installation under ceramic tile or stone in residential, commercial and industrial environments. Easily applied with a roller or brush on flat or curved surfaces, *Mapelastic AquaDefense* provides a continuous barrier to protect adjacent rooms and floors below from water damage. On common problem areas like coves, corners and cracks, combine it with MAPEI's optional *Reinforcing Fabric*. *Mapelastic AquaDefense* is an advanced liquid-rubber formula that allows tile installation with MAPEI polymer or epoxy mortars after just 30 to 50 minutes of dry time, and flood testing after 12 hours. *Mapelastic AquaDefense* exceeds ANSI A118.10 and ANSI A118.12 standards, and is IAPMO-listed for use as a shower-pan liner.

	Product Code	Packaging
U.S./	01953	1 U.S. gal. (3.79 L)
Canada	01968	5 U.S. gal. (18.9 L)
Special Order -	01977	Drum: 55 U.S. gal. (208 L)

Planiseal™ MRB

Moisture-Reduction Barrier

Planiseal MRB is a two-component, solvent-free epoxy coating specially formulated to reduce concrete's moisture vapor emission rates (MVERs) of up to 15 lbs. per 1,000 sq. ft. (6.80 kg per 92.9 m²) per 24 hours to a rate of below 3 lbs. per 1,000 sq. ft. (1.36 kg per 92.9 m²) per 24 hours. *Planiseal MRB* provides a uniform protective barrier for the installation of floor coverings, tile, stone and concrete toppings.

	Product Code	Packaging
U.S./Canada	45657000	Kit: 2 U.S. gal. (7.57 L)

Novoplan® 2

Polymer-Modified, Cement-Based, Self-Leveling Underlayment

Novoplan 2 is a high-strength, self-leveling, cement-based underlayment and repair mix for interior concrete and engineer-approved floors. *Novoplan 2* is suited for leveling, smoothing and repairing interior floors before the installation of floor coverings. Ceramic tile and natural stone can be installed 24 hours after application. Floor coverings – such as carpet, vinyl sheet goods, vinyl tile, vinyl composition tile (VCT), homogenous PVC, rubber and engineered wood plank – can be installed 1 to 3 days after application, depending upon thickness of application.

	Product Code	Packaging

Canada	1785000021	Bag: 50 lbs. (22.7 kg)

Waterproofing Membranes

Mapelastic™ 400

Premium Liquid Rubber Waterproofing Membrane

Mapelastic 400 is a flexible, thin, load-bearing, waterproofing and crack-isolation membrane system consisting of a premixed, quick-drying liquid rubber and reinforcing fabric. It is for installation under ceramic tile or stone in interior/exterior residential and commercial applications. Applied with roller or brush, *Mapelastic 400* enables tile to be installed with any MAPEI polymer or epoxy mortar after 1 to 3 hours of dry time, whereas shower pans can be flood-tested after 2 days of dry time. With minimal odor, *Mapelastic 400* is great for installations in confined spaces. It exceeds ANSI A118.10 and ANSI A118.12 standards, and is IAPMO-listed for use as a shower-pan liner.

	Product Code	Packaging
U.S./	33553	Kit: 1 U.S. gal. (3,79 L)
Canada	33568	Kit: 5 U.S. gal. (18,9 L)
	0170007	Fabric Roll: 38" x 75' (97 cm x 22,9 m)
Special Order -	0170055	Drum: 55 U.S. gal. (208 L)

Mapelastic™ 315

Flexible Cement-Based Waterproofing Membrane

Mapelastic 315 is a trowel-applied, two-part, flexible, fiberglass-mesh-reinforced waterproofing and crack-isolation membrane for use in residential, commercial and industrial applications. This durable, time-tested, cement-based product offers excellent bond with any MAPEI polymer or epoxy mortar. Shower pans can be flood-tested after 3 days, and tile can be set after 8 to 12 hours of curing time. To provide an excellent flexible transition between floors and walls, install *Mapelastic 315* with MAPEI's *Mapeband™* drain flashing and *Mapeband* cove roll on corners. *Mapelastic 315* exceeds ANSI A118.10 and ANSI A118.12 standards, and is IAPMO-listed for use as a shower-pan liner.

	Product Code	Packaging
U.S./	31534000	Kit: 34 lbs. (15,4 kg)
Canada	31550000	Bag: 50 lbs. (22,7 kg)
	31557000	Pail: 2 U.S. gal. (7,57 L)

Mapelastic™ HPG

Flexible Waterproofing and Crack-Isolation Membrane

Mapelastic HPG is a ready-to-use, highly flexible, acrylic-based waterproofing and crack-isolation membrane for use in residential to light commercial applications over concrete, masonry, cement board and engineer-approved, exterior-grade plywood. It can be applied to interior surfaces with a roller or trowel and has excellent compatibility with cement-based bonding materials. *Mapelastic HPG* also can be used as a crack-isolation membrane (when used with MAPEI's *Fiberglass Mesh*). When used with this mesh, *Mapelastic HPG* is IAPMO-listed for use as a shower pan liner and exceeds ANSI A118.10 standards. To provide an excellent, flexible transition waterproofing system between floors and walls, install *Mapelastic HPG* with MAPEI's *Mapeband* drain flashing and *Mapeband* cove roll.

	Product Code	Packaging
U.S./Canada	35553000	Bucket: 1 U.S. gal. (3,79 L)
	35568000	Pail: 5 U.S. gal. (18,9 L)

Reinforcing Fabric

MAPEI's *Reinforcing Fabric* is a strong, absorbent polyester reinforcing fabric for use with *Mapelastac 400* and for optional use with *Mapelastac AquaDefense*.

	Product Code	Packaging
U.S./	0170004	Roll: 6' x 75' (15 cm x 22,9 m)
Canada	0170007	Roll: 38' x 75' (0,97 m x 22,9 m)

Fiberglass Mesh

Fiberglass Mesh is an alkali-resistant mesh for embedment used to reinforce waterproofing membranes and crack-isolation membranes, including MAPEI's *Mapelastac™*, *Mapelastac 315*, *Mapelastac HPG* and *Mapelastac Smart*.

	Product Code	Packaging
U.S./	03101000	Roll: 3' x 75' (0,91 m x 22,9 m)
Canada	8040002	Roll: 3.28' x 328' (1,00 m x 100 m)
	8040003	Roll: 12' x 150' (30 cm x 45,7 m)

Mapecband™

Rubber-Coated Waterproofing Accessories
Mapecband cove roll and drain flashing are flexible, rubber-coated polyester accessories for waterproofing. They are designed for fast, easy embedment with MAPEI's *Mapelastac™*, *Mapelastac 315*, *Mapelastac HPG* and *Mapelastac Smart* waterproofing membranes over coves, corners, drains, expansion and movement joints.

	Product Code	Packaging
U.S./	02101000	Drain Flashing: 13.5" x 13.5" (34 cm x 34 cm)
Canada	02401000	Cove Roll: 3" x 163' (7,5 cm x 49,7 m)

Mapecguard™ SM

Crack-Isolation and Sound-Reduction Sheet Membrane

Mapecguard SM is a flexible, thin, load-bearing, fabric-reinforced, "peel-and-stick" crack-isolation and sound-reduction sheet membrane over which ceramic tile or stone can be installed immediately with a MAPEI latex-/polymer-modified cement-based or epoxy mortar and grout. *Mapecguard SM* has a Sound Transmission Class (STC) rating of 69, and an Impact Isolation Class (IIC) rating of 69 based on a 6" (15 cm) concrete slab with a drop ceiling.

	Product Code	Packaging
U.S./Canada	04050000	Roll: 3' x 50' (0,91 m x 15,2 m)

Mapesonic™ SM

Sound-Control and Crack-Isolation Sheet Membrane

Mapesonic SM is a flexible, thin, load-bearing, fabric-reinforced, "peel-and-stick" sound-control and crack-isolation membrane over which ceramic tile or stone can be installed immediately with a MAPEI latex-/polymer-modified cement-based or epoxy mortar and grout. Mapesonic SM has a Sound Transmission Class (STC) rating of 73 and an Impact Isolation Class (IIC) rating of 69 over 6" (15 cm) concrete slab with a drop ceiling.

MAPEI SM Primer™*

Water-Based Primer for Mapeguard SM and Mapesonic SM

MAPEI SM Primer is designed for priming properly prepared substrates before installing Mapeguard™ SM (formerly Mapelastic SM) and Mapesonic™ SM sheet membranes.

* Formerly Mapelastic SM Primer

Granirapid® System

Premium, Rapid-Setting, Flexible Tile Mortar

Granirapid is the next generation of high-performance, flexible mortar systems. As the industry's first and only fast-curing system geared for fast-track projects, it uses MAPEI's unique High-Hydrated Cement Technology (HCT™). It develops high, early mechanical strength and can be specified for the same demanding applications as Keralastic™; however, Granirapid will cure considerably faster because its superior drying-out characteristics produce low residual moisture behind the tile after 24 hours.

Unlike old-generation "rapid sets," Granirapid has a much better open and adjustability time while allowing application of grout in 3 to 4 hours. When used in conjunction with Ultracolor® Plus grout (also with HCT), the installation will allow water immersion in a revolutionary 72 hours, as opposed to 28 days for traditional systems. Granirapid is a definite must when time is critical. Granirapid is formulated from a shrinkage-compensated technology that allows medium-bed, high-build capability for large-format tile. Lastly, Granirapid (along with any HCT product) does not contribute to efflorescence.

Kerabond/Keralastic™ System

Premium Flexible Tile Mortar

The *Kerabond/Keralastic System* is the original and time-proven premium flexible mortar system designed for difficult-to-bond-to natural stone, large porcelain tile and glass-bodied tile. With more than 20 years of success, the *Kerabond/Keralastic System* still is recognized as the benchmark for performance in the tile industry. The *Kerabond/Keralastic System* combines *Keralastic™*, a highly flexible acrylic latex admixture, with *Kerabond™* premium dry-set mortar.

The 2-part advantage

MAPEI's two-component Flexible Mortar Systems are the time-proven, high-performance answer to tile and stone installations. These premium systems are unmatched in bond strength, flexibility and long-term performance in even the most demanding applications. Polymers give mortars such unique properties as bond strength and flexibility.

Single-component systems utilize a unique dry polymer requiring only the addition of water; however, there is a limit to the amount of dry polymer that can be added before the product loses its homogenous consistency. The liquid latex additive in two-component systems adds incredible flexibility and linear movement that prevents failures due to structural movement, vibration or impact.

Features and Benefits

- For residential, commercial and industrial applications
- Can be used in demanding applications such as exterior building facades, malls, airports, plazas, radiant-heated substrates, swimming pools and aquatic centers
- Superior attributes such as outstanding resistance to impact, vibration and water immersion
- Freeze/thaw and fatigue resistance
- Flexibility during substrate movements and extreme temperature changes
- Excellent balance between compressive, bond and flexural strengths, plus a consistent bond between the substrate and tile
- Approved for most substrates and tiles
- Proven performance, resulting in fewer failures and callbacks

Ultraflex™ 3

Premium-Grade, Tile Mortar with Polymer

Ultraflex 3 is a premium-grade, single-component, ultra high-performance, polymer-modified thin-set mortar for interior and exterior installations of dimensional stone, ceramic, porcelain and quarry tile. This mortar has a high content of a unique dry polymer, resulting in superior adhesion to the substrate and tile without the need of a latex additive. In addition, it can be used for most interior and exterior residential and commercial tile applications on floors and walls.

Ultraflex LFT

Premium Large-Format Tile Mortar with Polymer

Ultraflex LFT is a premium nonsag medium-bed and thin-set mortar designed for large-format and heavy tile and stone for interior/exterior floor, wall and countertop installations. This mortar has a high content of unique dry polymer, resulting in excellent adhesion to the substrate and tile. It is formulated with Easy Glide Technology™ for ease of application, and it includes Dust-Free Technology for a 90% reduction in dust while pouring and mixing. Ultraflex LFT meets or exceeds ANSI A118.4 and ANSI A118.11 requirements when mixed with water.

Ultraflex® RS

Premium-Grade, Rapid-Setting Tile Mortar with Polymer

Ultraflex RS is a premium-grade, single-component, high-performance, polymer-modified, rapid-setting mortar for ceramic tile, porcelain, marble, granite and slate installations. Formulated with MAPEI's unique High-Hydrated Cement Technology (HCT™), Ultraflex RS is designed for fast-track projects and installations. It can be used for both interior and exterior installations of tile in most residential floor and wall applications. In commercial applications, use on interior floor and wall installations and exterior floors. For exterior commercial wall applications, use either the Kerabond/Keralastic™ or Granirapid® system. Ultraflex RS meets or exceeds ANSI A118.4 and ANSI A118.11 requirements for fast-setting mortars when mixed with water.

Ker® 121

Professional-Grade Tile Mortar with Polymer

Ker 121 is a professional-grade, single-component, high-performance mortar for ceramic, marble, granite and porcelain stoneware installation over most traditional and specialty substrates. Ker 121 can be used for most interior and exterior residential floor and wall tile applications. In commercial applications, use on interior floor and wall installations and exterior floors. For exterior commercial wall applications, use either the Kerabond/Keralastic™ or Granirapid® system. Ker 121 meets or exceeds ANSI A118.4 and ANSI A118.11 requirements when mixed with water.

Ultraflex™ 2

Professional-Grade Tile Mortar with Polymer

Ultraflex 2 is a professional-grade, single-component, high-performance, polymer-modified thin-set mortar for interior and exterior installations of dimensional stone, ceramic, porcelain and quarry tile. This mortar has a high content of a unique dry polymer, resulting in excellent adhesion to the substrate and tile. Ultraflex 2 can be used for most interior and exterior residential floor and wall tile applications. In commercial applications, use on interior floor and wall installations and exterior floors. For exterior commercial wall applications, use either the Kerabond/Keralastic™ or Granirapid® system. Ultraflex 2 meets or exceeds ANSI A118.4 and ANSI A118.11 requirements when mixed with water.

Ultraflex™ 1

Standard-Grade Tile Mortar with Polymer

Ultraflex 1 is a single-component, polymer-modified, thin-set mortar for interior and exterior installations of dimensional stone, ceramic, porcelain and quarry tile. This mortar has an above-average content of a unique dry polymer, resulting in good adhesion to the substrate and tile. Ultraflex 1 can be used for both interior and exterior installations of tile in most residential floor and wall applications. In commercial applications, use on interior floor and wall installations and exterior floors. For exterior commercial wall applications, use either the Kerabond/Keralastic™ or Granirapid® system. Ultraflex 1 meets or exceeds ANSI A118.4 and ANSI A118.11 requirements when mixed with water.

Ker® 111

Economy-Grade Tile Mortar with Polymer

Ker 111 is a single-component, thin-set mortar for interior and exterior installations of dimensional stone, ceramic, porcelain and quarry tile. This mortar is formulated with a unique dry polymer, resulting in good adhesion to substrates and tile.

Ker 111 can be used for interior and exterior installations of tile in most residential floor and wall applications. In commercial applications, use on interior floors and walls as well as exterior floors. For exterior commercial wall applications, use either the Kerabond/Keralastic™ or Granirapid® system. Ker 111 meets or exceeds ANSI A118.4 requirements when mixed with water.

Ultracontact™ RS

Premium-Grade, Rapid-Setting Full-Contact Tile Mortar with Polymer

Ultracontact RS is an ultra premium, rapid-setting, polymer-modified, high-performance full-contact mortar. It uses MAPEI's High-Hydrated Cement Technology (HCT™), allowing grout in 3 hours. Ultracontact RS meets or exceeds ANSI A118.4 and ANSI A118.11 requirements when mixed with water.

Ultracontact™

Premium-Grade, Full-Contact Tile Mortar with Polymer

Ultracontact is an ultra premium, normal-setting, polymer-modified, high-performance full-contact mortar. This high-flow, full-contact technology takes the guesswork out of mortar transfer and eliminates the need for back-buttering, making it ideal for even large-format tile and stone. Ultracontact meets or exceeds ANSI A118.4 and ANSI A118.11 requirements when mixed with water.

Kerapoxy® 410

100%-Solids Epoxy Setting Mortar

Kerapoxy 410 is a solvent-free, 100%-solids epoxy setting floor and wall mortar that is suited for areas where most chemical-resistant setting material is necessary. Kerapoxy 410 is formulated to be used as a nonsag thin-set for wall applications of porcelain and monocottura tile up to 12" x 12" x 3/8" (30 cm x 30 cm x 10 mm) in format. It also has high compressive strength, which provides excellent impact strength in commercial facilities. Kerapoxy 410 is designed for setting most types of tile.

Keraset®

Professional Tile Mortar

Keraset is a professional-grade, dry-set mortar for use in most interior/exterior residential floor and wall applications.

Keraflor™

Standard Tile Mortar

Keraflor is a dry-set mortar for use in interior/exterior residential and light commercial floor applications.

Keralastic™

Premium-Grade, Flexible-Mortar Latex Additive

Keralastic is a premium-grade, high-performance, second-generation “flexible” acrylic latex additive used in the *Kerabond/Keralastic™* System. This highly recommended additive enhances bond strength, flexural strength, elongation and freeze/thaw durability. To ensure proper flexibility, always use a latex additive when using a dry-set mortar for applications over plywood and for setting nonvitreous, semivitreous, vitreous and impervious tiles.

See the *Kerabond/Keralastic* System’s Technical Data Sheet for the complete attributes of this setting system.

ANSI A136.1, Type 1

Type 1™

Premium-Grade Floor and Wall Tile Adhesive

Type 1 is a professional-grade, traditional, nonflammable, organic adhesive for setting impervious, vitreous, semivitreous and nonvitreous tile over gypsum drywall (walls only), cement board, exterior-grade plywood, concrete and masonry block. Use Type 1 to install floor tiles up to 6" x 6" (15 x 15 cm), and wall tiles up to 10" x 10" (25 x 25 cm). Nonslip for vertical use, Type 1 has extended working time for easy application.

Ker® 909

Professional Floor and Wall Ceramic Tile Adhesive

Ker 909 is a ready-to-use, nonflammable, high-viscosity, synthetic polymer emulsion-based adhesive. Ker 909 is used for residential and light commercial interior installations of wall tiles up to 8" x 8" (20 x 20 cm), and interior residential floor and countertop tile up to 6" x 6" (15 x 15 cm). Ker 909 also has a minimal odor, making it ideal for tile installations in confined or restricted areas.

Kerapoxy® IEG

100%-Solids, Industrial-Grade Epoxy Grout

Kerapoxy IEG is a water-cleanable 100%-solids epoxy grout, with high chemical and stain resistance. It is a nonshrinking, nonsagging, fast-curing, efflorescence-free grout. It is ideal for installations where high-strength, mold- and mildew-resistant grout joints are required. Kerapoxy IEG has high temperature resistance and can be steam-cleaned. It is formulated for use in cooler temperatures. Kerapoxy IEG's high strength as well as its high resistance to chemicals, mold and mildew make it the perfect for use in industrial and heavy commercial applications.

Kerapoxy®

Premium, Stain-Free, 100%-Solids Epoxy Mortar and Grout

Kerapoxy is a premium-grade, water-cleanable, 100%-solids, high-strength epoxy mortar and chemical-resistant nonsagging grout system. Available in all MAPEI colors for grouting, *Kerapoxy* is excellent for countertops, high-traffic areas, and areas needing stain and chemical resistance. *Kerapoxy*'s unique formula allows it to be used as both a grout and mortar.

ISO 13007 R2T/RG  

Product Code	Packaging (Liquid Unit)
U.S./	Kit: 1 U.S. qt. (946 mL)
Canada	Kit: 1 U.S. gal. (3.79 L)
*	Kit: 2 U.S. gal. (7.57 L)

* Refer to price list for product codes and colors.

ANSI A118.3

Opticolor™

Optimum-Performance, Easy-Clean, Stain-Free Grout

Opticolor is an improved, water-cleanable, reactive resin grout with chemical and stain resistance. It is a nonsagging, efflorescence-free grout with no shrinkage. *Opticolor* provides color uniformity, stain resistance and durability beyond that of cement grouts. In addition, it is easy to maintain, will clean to the original color and contains BioBlock™ technology. *Opticolor* is great for use in wet-area applications, such as showers, swimming pools, fountains and steam rooms.

NEW Ultracolor® Plus

Premium Rapid-Setting Sanded Grout with Polymer

Ultracolor Plus with DropEffect™ technology is an ultra premium, fast-setting, polymer-modified, color-consistent, nonshrinking, efflorescence-free grout for joint widths from 1/8" to 1" (3 mm to 2.5 cm). DropEffect technology reduces surface absorption to help repel water, dirt and grime from penetrating grout joints. *Ultracolor Plus* is specially formulated with MAPEI's High-Hydrated Cement Technology (HCT™) to eliminate the common problems related to Portland-cement grout, such as color consistency and efflorescence.

ISO 13007 CG2WAF 

Product Code	Packaging
U.S./	Bag: 10 lbs. (4.54 L)
Canada	Bag: 25 lbs. (11.3 kg)

* Refer to price list for product codes and colors.

ANSI A118.6 and ANSI A118.7

Premixed Grout

Ready-to-use grout

Premixed Grout is a premium stain-resistant grout for ceramic, porcelain and natural-stone tile in residential light-duty interior installations, such as walls, floors, countertops and showers. *Premixed Grout* is mold- and mildew-resistant and can be used for grout joints from 1/16" to 1/2" (1,5 to 12 mm). Use for intermittent wet conditions such as residential backsplashes, countertops, tubs and surrounds, shower walls and shower floors.

Keracolor™ S

Premium-Grade, Polymer-Modified Sanded Grout

Keracolor S is a premium-grade, pre-blended, polymer-modified sanded Portland-cement tile grout that requires only the addition of water for mixing. It will grout joints from 1/8" to 5/8" (3 to 16 mm).

Keracolor™ U

Premium-Grade, Polymer-Modified Unsanded Grout

Keracolor U is a premium-grade, pre-blended, polymer-modified unsanded Portland-cement tile grout that requires only the addition of water for mixing. It will grout joints from 1/16" to 1/8" (1,5 to 3 mm).

Keracaulk™ S

Premium Sanded Siliconized Acrylic Caulk
Keracaulk S is a premium-grade, easy-to-use, easy-to-clean sanded siliconized acrylic caulk formulated to match all of MAPEI's grout colors.

Keracaulk™ U

Premium Unsanded Siliconized Acrylic Caulk
Keracaulk U is a premium-grade, easy-to-use, easy-to-clean unsanded siliconized acrylic caulk formulated to match all of MAPEI's grout colors.

Keraclean™ E

Epoxy Grout Film Remover
Keraclean E epoxy grout film remover contains no methylene chloride. Formulated with no hazardous materials and low vapor pressure, *Keraclean E* is safe to handle and does not pose explosion or inhalation hazards. This remover is completely miscible with water and biodegradable. The residue and the film it has removed require special waste disposal (see Technical Data Sheet for details).

Providing education as a key to success

MAPEI strongly believes in supporting the training of architects, engineers, distributors and installers. The MAPEI Technical Institute – located in facilities in Florida, Texas and California as well as in Laval, Canada – conducts two- and three-day training courses in custom-designed, high-tech facilities. These courses offer practical demonstrations, hands-on workshops, video presentations and seminars.

Tile & Stone Installation Systems (TSIS)

Basics and Hands-On Training

Covers products for surface preparation, waterproofing, crack isolation, tile and stone installation, and grouting

Floor Covering Installation Systems (FCIS)

Basics and Hands-On Training

Covers products for surface preparation, moisture mitigation, vinyl, rubber, carpet and wood flooring

Concrete Restoration Systems (CRS)

Basics and Hands-On Training

Focuses on levelers, toppings, moisture mitigation and concrete repair

Sign up for MTI training by contacting your local MAPEI sales representative. For details on U.S. seminars, contact Maria Albertorio at (954) 246-8538. For details on seminars in Laval, please contact Raffaellina Aceto at (450) 662-1212, extension 293.

MAPEI is **GREEN** worldwide.

Directing 70% of Research & Development efforts toward formulating ecologically sustainable solutions for flooring installations.
