MIDPACK-SHIPPING MATERIALS

Bubble Pack Wrapping

MidPack Shiplite Mailers: MidPack Shiplite Mailers are padded self-sealing or heat-sealing mailers featuring exceptional strength and durability. These lightweight envelopes reduce shipping charges while special tamper-proof design assures maximum security. Available in fourteen popular standard sizes or in custom ordered dimensions. These mailers are manufactured to tolerances within 1/4", to conform to your special shipping needs. Also available in kraft and white stock.

MidPack Protective Wrap: MidPack Protective Wrap is available in a range of bubble sizes from 1/8" to 1/2" to efficiently cover any application. Standard rolls come stock uninterrupted with 12" perforations and 12" or 24" slits. Custom perforations are also available to reduce waste. Our protective wrap is also available with our anti-static treatment which eliminates potential damage resulting from electrostatic discharge commonly experienced with polymer-based products.

MidPack Retail Rolls: The same tough, durable cushioning protector as our MidPack Protective Wrap but in smaller shop-friendly lengths for ease of storage and economy of dispensation. This state-of-the-art cushioning provides x2 protection to the products you ship. Custom perforations are available to efficiently cover your particular products and budgets. Available in regular, anti-static or recyclable.

MidPack Handy Rolls: MidPack Handy Rolls are compact and easy to store, yet as durable and shock resistant as our industrial sizes. These handy 16" wide rolls are perfect for home and office applications where space and usage are limited. Available in regular or anti-static, these rolls are ideal for smaller items such as electronics, ceramics, delicate tooling or for occasional user.

MidPack Sheet Dispensers: For the protection of smaller products, the MidPack Sheet Dispenser combines convenience with ease of application. Available in a range of thicknesses, widths and lengths to maximize efficiency and economy of usage. Stock sizes have 12" perforations and can be ordered with anti-static or recyclable protective wrap. Our dispensers keep the protective wrap neat and clean for each job. Simple to use and easy to store in mailroom or shipping department.

MidPack Protective Pouches: MidPack Protective Pouches are lightweight yet tough enough to protect against vibration and shock abrasion. These shipping bags can be ordered for production-style heat-sealing or convenient self-sealing and are available in an impressive array of sizes for a range of common and special applications with ease of preparation. Available in regular or anti-static.

MidPack Laminates: For your unique products, MidPack Laminates offer the ultimate in adaptability. MidPack Protective Wrap combined with foil, foam or paper backed wrap, allows many commercial and industrial uses. All combinations allow the opportunity to use special safekeeping properties of these materials plus the MidPack Protective Wrap to provide you with the best solution for the most challenging projects.

MidPack Poly Foam: Durable, water resistant and available in a wide selection of stock sizes to cover any specific dimensions. MidPack Poly Foam is lightweight and non-abrasive foam which offers versatility as well as flexibility. Superior strength allows MidPack Poly Foam to be reused for additional economy. Custom slitting and perforations are available to provide cost-cutting efficiency.
