## About CRRC

Established in 1998, the CRRC (Cool Roof Rating Council) is a non-profit association focused on implementing a fair, accurate, and credible radiative energy performance rating system for roof surfaces and disseminating the information to all interested parties. The Product Rating Program, the core element of the CRRC, was launched in September 2002 with the purpose of reporting initial and three-year aged values for solar reflectance and thermal emittance.

CRRC listed products can be found at [www.coolroofs.org](http://www.coolroofs.org)

**Alternative Methods of Installation**

### The story behind the Mule-Hide name...

A four-horse wagon was stuck in the mud. To help out, another driver hitched two more horses, but the wagon was still stuck. Then a wagon with two mules came by and the men replaced all six horses with the mules. The two mules dug down & pulled the wagon out. Their impressive strength was the inspiration for the name that has been trusted in roofing since 1906.
