

# What an Investment!

PVC  
SYSTEMS

A white roof with proven, premium performance, Mule-Hide PVC offers years of protection, energy efficiency with virtually no maintenance.

Reinforced PVC is specially designed with weft-inserted polyester knit fabric. Even when punctured, the fabric is engineered to "rope up" and resists tearing for superior durability with excellent abrasion and puncture resistance. Weighs less than 1 lb. per sq. ft. yet highly resistant to wind uplift, fire, fungus, ozone & UV. The flexibility of our membrane means your PVC roof can be installed during winter months and it easily handles building thermal expansion & contraction. And, Mule-Hide PVC has minimal shrinkage for watertight integrity.

## The story behind the Mule-Hide name...

The original Mule-Hide trade name was registered in 1906. Mule-Hide manufactured top quality roofing products that quickly gained a reputation for long lasting performance. The "Mule-Hide" name developed because of an incident witnessed outside an office in Chicago. As the story goes, a horse drawn wagon with four horses was stuck in the mud. To help out, another driver hitched two more horses to the wagon. They were still unsuccessful. A short time later, a wagon with two mules came by. They took off all of the horses and hooked up the two mules. The mules dug down hard and pulled the wagon out. The impressive strength and durability of the mules would express those same qualities associated with the roofing materials Mule-Hide Products came to represent.

## Mule-Hide PVC Roofing Systems:

- Membrane meets or exceeds ASTM performance standards.
- UL and FM listed assemblies are provided to contractors.
- Mule-Hide Manufacturer Warranties available.

*"The name trusted in roofing since 1906"*

**MULE-HIDE®**

# What can you expect from your Mule-Hide PVC Roof?

**The Best Lifecycle** - A Mule-Hide PVC Roofing System provides excellent resistance to fire, UV, airborne bacteria, and industrial pollutants such as air conditioning coolants.

**Energy Efficient Roof** - White surfaces have been shown to reflect up to 78% of the sun's rays to reduce air-conditioning costs. The superb reflectivity of our white PVC even reduces the heat build-up under the membrane. Mule-Hide PVC white membrane adds to the aesthetics of the building while increasing energy efficiency.

**Lightweight yet Strong System** - A Mule-Hide PVC Roofing System keeps moisture out, yet is lightweight, making it ideal for new construction and retrofit installations without adding excessive weight to the roof deck. Stands up to repeated exposure to severe climates, high winds, building movement, and routine rooftop traffic.

**Heat-Welded Seam Strength** - Mule-Hide PVC Roofing Systems use a heat-welding process that fuses the membrane seams to form a permanent, watertight seal. Superior wind resistance so seams won't peel apart. Superior flexibility so seams won't pull apart. The roof becomes like one piece from edge to edge.

**Installed Cost Value** - Mule-Hide PVC Roofing Systems install quickly in one-pass with a small, trained crew and that means lower labor costs, which translates into installed cost value for you.

**Flexibility** - Our PVC membrane remains flexible in hot and cold temperatures so it will not split or crack. Mule-Hide PVC can handle the desert sun, sand, Arctic freezes, and torrential downpours.

**Repairable** - Our PVC membrane remains repairable year after year, allowing for ease of future cutouts and tie-ins. New membrane can be welded to existing - a great benefit during remodeling or expansion. Can be power washed to retain like-new appearance.

## A Mule-Hide PVC Roof is more resistant to organic & inorganic chemical compounds than other roofing systems.

Acetic Acid / Vinegar  
Acetone  
Aircraft Exhaust  
Ammonia  
Benzl Acid or Benzl Alcohol  
Borax  
Brine / Salt  
Carbon Dioxide (dry or wet)  
Citric Acid  
Detergents / Soap  
Emulsifiers  
Fatty Acids  
Glycol  
Hydrochloric Acid  
Meat Juices  
Olive Oil  
Plating Solutions  
Potassium  
Paraffin Wax  
Starch  
Sugars & Syrups  
Yeast
