ARTICLE PREFACE

This product, under normal use and conditions, is considered an "Article" under the Occupational Health and Safety Administration's Hazard Communication Standard (29CFR 1910.1200c). Based upon the company's hazards assessment, knowledge of the product and uses, **this product does not pose a physical or health hazard to employees and or end users**. Consequently there is no regulatory requirement to develop an MSDS with respect to this product. This non-hazardous MSDS is being provided solely because certain end users require a MSDS regardless of no hazards, lack of regulatory requirements and the above determination.

For purposes of this Article Preface, "Article" means a manufactured item other than a fluid or particle: (i) which is formed to a specific shape or design during manufacture; (ii) which has end use function(s) dependent in whole or in part upon its shape or design during end use; and (iii) which under normal conditions of use does not release more than very small quantities, e.g., minute or trace amounts of a hazardous chemical, and does not pose a physical hazard or health risk to employees.
