

Plastic Components is a leading manufacturer of an extensive selection of PVC plastic trims since 1969. Their exceptional quality has been certified by and listed with Intertek Testing Services/Warnock Hersey.

## WHAT DOES WARNOCK HERSEY CERTIFICATION MEAN TO YOU?

Plastic Components' is the *only* PVC trim manufacturer to submit its products to Intertek Testing Services/Warnock Hersey, the internationally known third-party certification agency, for evaluation and certification by meeting the strict standards set by ASTM for tensile and flexural strength, dimensional stability and weather resistance. All Plastic Components' trims bearing the WHI Listed Mark have been tested and meet or exceed the prescribed product safety standards and/or performance criteria in the United States and Canada.

## HOW CAN THE WHI MARK HELP YOU?

The Warnock Hersey Mark is North America's most recognized product safety and performance mark for building products. The WHI mark is a certification mark issued by Intertek. The WHI mark demonstrates product compliance to safety and/or performance standards. Intertek does not manufacture products of any kind.

Building and construction materials bearing the WHI Mark indicate to your customers and end-users product compliance to relevant building codes, association criteria, and product safety and performance standards. The mark also signifies that the product's manufacturing site(s) undergo periodic follow-up inspections to ensure ongoing *compliance* of the originally certified product. Field inspections consist of line sampling and inspection to ensure that the products continue to be produced in the same manner as the products which were originally certified.

With Plastic Components products being certified by Warnock Hersey, you can be assured that you are using the best quality products on the market for your customers.

Tested and Listed by Warnock-Hersey  
to assure quality and performance.
