Once you've cleaned brick

Wipe out the other threats to the beauty and durability of your concrete, brick and natural stone investments.

Weather Seal products**

give your vertical and horizontal concrete and masonry deep, long-lasting protection against salt attack, water penetration and more.

Paver Kare® products**

clean, protect, enhance and maintain the appearance of concrete, clay and natural stone pavers. Whether you're cleaning embedded dirt or efflorescence, or protecting from spills and stains, Paver Kare® products help valuable paver hardscapes look better and last longer.

Defacer Eraser® graffiti control products**

win the war against graffiti! Pesky graffiti practically slides off surfaces protected and cleaned with Defacer Eraser® graffiti control products.

Stand Off® products**

keep the enemies of valuable stone and ceramic tile at bay. Stand Off® cleaners and protective treatments guard stone and tile surfaces indoors and out from oil, grease, grime, food and water stains. Only from PROSOCO.

Sure Klean® restoration cleaners

remove atmospheric dirt, carbon, paint, algae, oxidation, body oil, nicotine staining and more from many older interior and exterior masonry surfaces.

***For VOC information on PROSOCO's protective treatments, see the current applicable product data sheet.*

The first name and the last word in cleaning, protecting and maintaining your masonry investment.

Innovative solutions for buildings.™

1 - First Choice, 2 - Second Choice, 3 - Third Choice, E - Color Enhancing

**See Stand Off® Tile, Paver and Stone Care Products*

If brick is prone to staining from metallic oxidation, use Vana Trol®.

Always test to ensure desired results and proper dilution where appropriate.

Clean Brick Quick

Cleaning brick quick doesn't mean using harsh, unsafe chemicals like muriatic acid. In fact, the fastest way to clean brick is also the safest! With Sure Klean® products — ***it's as quick and easy as 1-2-3-4!***

When it comes to cleaning brick, muriatic acid works fast...so fast that you need to apply it and rinse quickly to avoid etching and staining. That limits the size of your work areas and increases the labor you use to clean a brick wall.

If you try to reduce the labor needed to use muriatic acid effectively, you risk being called back to correct staining or repair damage.

Sure Klean® products are designed to clean masonry. Muriatic acid is not. Sure Klean® works slower, so you can apply it to larger areas and rinse at one time without the risk of streaking or etching.

You'll get better production, better results and fewer callbacks. That adds up to money in your pocket.

Use Sure Klean® masonry cleaners and do it right the first time.

Better production
Better results
Fewer callbacks = **Money in your pocket**

Note: Always test. Refer to product data sheet for more detailed product and application information.

1. Thoroughly prewet a large area of masonry (up to 150 square feet) with clean water.

2. Using a masonry brush or low pressure spray, apply the prediluted cleaner freely. (Refer to product selection guide for product recommendations.)

3 Allow cleaner to remain for 1 to 3 minutes. Scrape off heavy excess mortar buildup with wooden scraper or brick. Reapply cleaner.

4. Rinse thoroughly with clean water.
