

# Spec Formliners INCORPORATED

Pattern Number: **1201**

## Rough Sawn 8" Wood

1" (25mm) deep alternating hi-lo wood grain pattern.

### GENERAL INFORMATION

**ATTACHMENT TO FORMWORK** – Liners are attached to the form using TEK screws through the face of the liner spaced 12" C-C. Optional form mounting T-nuts embedded through the plywood backing is available for Elastospec panels.

**FORM RELEASE** – Apply with low flow, wide angle, flat spray nozzle and wipe with a cloth to insure a complete even coat to the entire form liner surface. Do not over apply form release agent. Protect treated form liners from precipitation, dust, and debris. Do not apply to reinforcing steel. **Dayton Superior Liner Coat? (J-4 LC)** form release, or equal, is approved for all form liner materials.

**TECHNICAL SUPPORT** – Contact Spec Formliners, Inc. 888 429-9550

**Note: Plastic Liners may require additional backing**

## Split Cedar Shingle

1/2" (13mm) depth

4" to 6" lap with 4" to 8" random shingles

### GENERAL INFORMATION

**ATTACHMENT TO FORMWORK** – Liners are attached to the form using TEK screws through the face of the liner spaced 12" C-C. Optional form mounting T-nuts embedded through the plywood backing is available for Elastospec panels.

**FORM RELEASE** – Apply with low flow, wide angle, flat spray nozzle and wipe with a cloth to insure a complete even coat to the entire form liner surface. Do not over apply form release agent. Protect treated form liners from precipitation, dust, and debris. Do not apply to reinforcing steel. **Dayton Superior Liner Coat? (J-4 LC)** form release, or equal, is approved for all form liner materials.

**TECHNICAL SUPPORT** – Contact Spec Formliners, Inc. 888 429-9550
