OF YOUR DECK

WITH THE MOST ADVANCED SYSTEM ON THE MARKET

Environmentally Safe and OSHA Compliant
Abrasion and Weather Resistant
Versatile
Passed I.C.B.O. testing for a
Class "A" one hour fire rating.

WE ARE THE ANSWER.

Super-Krete® Underlayment is a proprietary copolymer designed to achieve the highest quality protection in waterproof decking. Now you can avoid the costly replacement of time-eroded plywood by arming it with the most advanced waterproofing system available.

Weather resistant and nonreemulsifiable, Super-Krete Underlayment is a durable cement and sand mixture that is effective in virtually any climate. With the ability to withstand freeze and thaw cycles, this superior product has a proven success record and can be applied in thickness from 1/8" to 6". Preserve your investment. Preserve your decks with quality protection from Super-Krete.

For the maximum total protection of your deck, contact us about the Super-Krete Underlayment System.
