DRAINAGE FOR HOME AND GARDEN

For domestic drainage applications around the home, garden, etc., ACO manufactures a variety of drainage products.

1. Homedrain

"Homedrain" is a 4" internal width, plastic channel and grate system. It is an ideal DIY product, being lightweight and easy to install. It is available with closing end caps and bottom outlets.

"Homedrain" is strong enough to cope with occasional vehicular traffic, is ideal for use around swimming pools, barbecue areas, tennis courts, and garden landscape paths.

2. Raindrain

"Raindrain" is a 4" internal width, polymer concrete channel and galvanized steel grate trench drain system. Its practical, robust nature makes it ideal to withstand constant light vehicular traffic.

"Raindrain" is a complete system including in line catch basins and closing end caps.

"Raindrain" is standard with a stainless steel boltless locking device which makes it ideal for areas such as garages, driveways, walkways, and decks.

3. Pointdrain

"Pointdrains" are individual catch basins manufactured from either polymer concrete or molded plastic. Sizes are available from 10"x10" up to 18"x18". Grates are available in a variety of materials to take loadings of pedestrians up to light vehicles.

"Pointdrains" are ideal single inlet drains around the home and garage.

4. Drainmat

Drainmat is a unique entrance drain which comprises of a polymer concrete body, complete with connection outlet in the base, and surface grill/mat to walk across. Drainmat comes in 3 sizes and is available with either an aluminium and rubber bar grate, an aluminium and carpet bar grate or

a galvanised steel mesh grate.
