Stainless steel frame - 36" (0.915m)*	98545	-	-	-	-	-	-	-	-	-	19.3
Closing cap (female) with black end frame	98365	-	-	-	-	20.38	20.38	518	518	-	1.1
Closing cap (female) with galv. steel end frame	98386	-	-	-	-	20.38	20.38	518	518	-	1.1
Closing cap (female) with S/S end frame	98375	-	-	-	-	20.38	20.38	518	518	-	1.1
Closing cap (male) with black end frame	98363	-	-	-	-	20.38	20.38	518	518	-	1.3
Closing cap (male) with galv. steel end frame	98382	-	-	-	-	20.38	20.38	518	518	-	1.3
Closing cap (male) with S/S end frame	98372	-	-	-	-	20.38	20.38	518	518	-	1.3
Outlet cap (male) with black end frame	98361	20.25	20.25	514	514	20.38	20.38	518	518	-	1.8
Outlet cap (male) with galv. steel end frame	98381	20.25	20.25	514	514	20.38	20.38	518	518	-	1.8
Outlet cap (male) with S/S end frame	98373	20.25	20.25	514	514	20.38	20.38	518	518	-	1.8
Vertical outlet adapter - 4", 6" or 8" outlet	98103	20.25	20.25	514	514	20.38	20.38	518	518	-	1.6

- Notes:
1. Invert depths are for the channel body & frame assembled.
 2. Channel weights are for fiberglass body only.
 3. Closing/Outlet caps can be cut down to suit all channels.
 4. Add 2" to length of each channel for female joining flange (only applicable at shallowest end of trench run).
 5. Frames supplied with plastic snap-fit studs for connecting to fiberglass body.
 6. See page 122 for grate details.
- * Grade 304 stainless steel frames, ACO recommends the use of non-galvanized grates with stainless steel frames to avoid galvanic corrosion.

Other ACO products

Exernal drainage

ACO Sport

Surface drainage and building accessories for track & field.

ACO Infrastructure

Surface drainage products engineered for highways, urban roads and bridges.

Aquaduct

Custom design and manufacture of fiberglass trench drain systems.

ACO Duct

Linear ducting system with removable solid covers.

ACO Environment

Oil water separators and spill containment systems.

ACO Wildlife

Tunnel and fence system to guide amphibians and other small creatures safely across roads.

ACO StormBrixx

A unique and patented plastic geocellular storm water management system.

ACO Self

Simple drainage and building components for use around the home, garden and office.

Building drainage

ACO Stainless

Stainless steel trench drains.

ACO Floor Drain

Stainless steel floor drains.

ACO BuildLine

Drainage products for thresholds, balconies, green roofs and building façades.

ACO Pipe

Stainless steel push-fit pipe system.

ACO ShowerDrain

Shower drainage.

QuARTz

Designer bathroom floor solutions.

ACO External Drainage

ACO DRAIN

FlowDrain Line

FG200 - 8" internal width, 9 ft long fiberglass channels

ACO DRAIN

ACO Drain is the market leading modular trench drain system and is ideal for commercial applications varying from gas stations to airports.

ACO Drain systems consist of factory manufactured, modular channel units made from either corrosion-resistant, polymer concrete or fiberglass, together with grates from a variety of materials for all loading applications. ACO Drain systems are available in 2", 4", 8" and 12" internal widths, and most systems are available with a built-in slope for up to 130 ft (40 meters) of continuous slope.

The ACO Drain product line is segmented into different product types depending on use:

- 1. **KlassikDrain**
KlassikDrain - K100/K200/K300
MiniKlassik - KS0
Brickslot
- 2. **PowerDrain**
PowerDrain - S100K/S200K/S300K
- 3. **Slab Solutions**
SlabDrain
FlowDrain
MembraneDrain

FlowDrain

FG200 is an 8"(200mm) wide fiberglass system supplied in 9ft (2.75m) sections making it ideal for long straight runs in a concrete slab.

Galvanized, coated or stainless steel frames attach to the fiberglass former to provide a neat edge, grate seat and grate locking bar.

A choice of galvanized and stainless steel bar grates rated to Class C (25 ton) or ductile iron slotted or longitudinal grates rated to Class E (60 ton) are available.

Grates are bolted into the steel frame with 2 bolts per 18" section.

Typical applications

- Airports
- Parking lots and garages
- Industrial areas
- Gas stations
- Commercial applications
- Internal areas

Product overview - FG200

Choice of steel frame - Provides grate support and protects channel edge from damage. Available in black coated, galvanized and stainless steel.

Bolted grates - FG200 grates are lockable with two 1/2" - 13 x 1 1/2" bolts fixing directly into steel frame at 18" (457mm) intervals.

Snap-fit studs - Hold channel body securely to frame and allows quick assembly on-site. Supplied with frame.

Direction arrow - Sticker on side of channel indicates flow direction and ensures channels are installed correctly.

Fiberglass - A lightweight material that is made from polyester resin binder reinforced by glass matting and fibers.

Sloped (1.0%) channel units - 9' (2.75 meter) long units provide 108' (32.9 meter) continuous slope. Equates to 1/8" fall per linear foot. Four constant depth channels extend run lengths. Four 3' (0.915 meter) units and accessories also available.

Choice of grates - In various materials and styles (including ADA compliant) for applications up to Load Class E.

Nelson studs - Attached to frame; act as concrete anchors to secure channels into concrete surround.

Installation brackets - Provide simple and easy installation using No. 4 or 5 rebar.

Bracing blocks - Supplied to brace deeper channels during concrete pour; details on how to position are shown on a sticker on each channel.
