

ACO Drain® KlassikDrain K300/KS300

12" Internal Width General Purpose System

DrainLok & QuickLok® Grate Locking Options

Integral Galvanized or Stainless Steel Edge Rail

Wide Choice of Grates

Interconnecting End Profiles

System Numbering

Adjacent Channel Numbering

Polymer Concrete Channel

Knockouts for Pipe Connections

Profiled Side Walls

Installation Devices Available

Sloped (0.5%) Channel Units

K300 is a 12" wide sloping system with a galvanized steel edge rail and a broad choice of grates in different materials and slot styles up to Load Class E (60 ton) featuring either patented DrainLok or QuickLok® boltless locking systems.

KS300 is the same system, but the edge rail is grade 304 stainless steel and should be used where increased aesthetics or increased corrosion resistance is required.

For heavy duty applications, see ACO PowerDrain® product line.

Loading class is grate-dependent.

TYPICAL APPLICATIONS

- Parking lots & garages
- Shopping malls
- Pedestrian areas
- Light industrial areas
- Commercial areas
- Internal applications

ACO Drain®

KlassikDrain K300/KS300

12" Internal Width General Purpose System

DRAINLOK - BOLTLESS & BARLESS LOCKING SYSTEM

Factory-fitted locking device removes need for bolts and bars and improves channel hydraulic capacity. The DrainLok mechanism clips into channel edge rail for rapid installation. DrainLok grates are fit with an anti-shunt mechanism that restricts unwanted grate movement when installed, improving durability and longevity of the system.

QUICKLOK® - BOLTLESS LOCKING SYSTEM

QuickLok® is a patented, boltless locking system offering quick fitting and removal of grates. Use of QuickLok grates reduces installation and maintenance time and cost. Grates are supplied with a QuickLok locking stud which push-fits into a stainless steel spring clip in the QuickLok locking bar.
