KUWAIT K.O.C

Multiple 5m x 5m (16.4' x 16.4') Roof Hatches in double-leaf design electrically actuated installed on 32m (105') high roof, to facilitate transfer of equipment and machinery through roof for marine fabrication. (plans shown on left)

SECURE ACCESS IN TIMES SQUARE

Acudor produced Gas-strut operated multi-compartment water tight door assemblies. These doors were installed in Granite Benches for public use in Times Square, NY.

Benches range from 7.6m x 19.8m (25' to 65') in length, each have cavities on rear face to house Electrical, Broadcast and Data Control systems.

Acudor doors will provide secure access to such services while blending with their surroundings. These gas-strut operated multi-compartment water-tight door assemblies are typically H33cm x L233.7cm (H13"x L92") manufactured from 316 grade Stainless Steel coated with Plasma Stream Deposit for enhanced aesthetics.

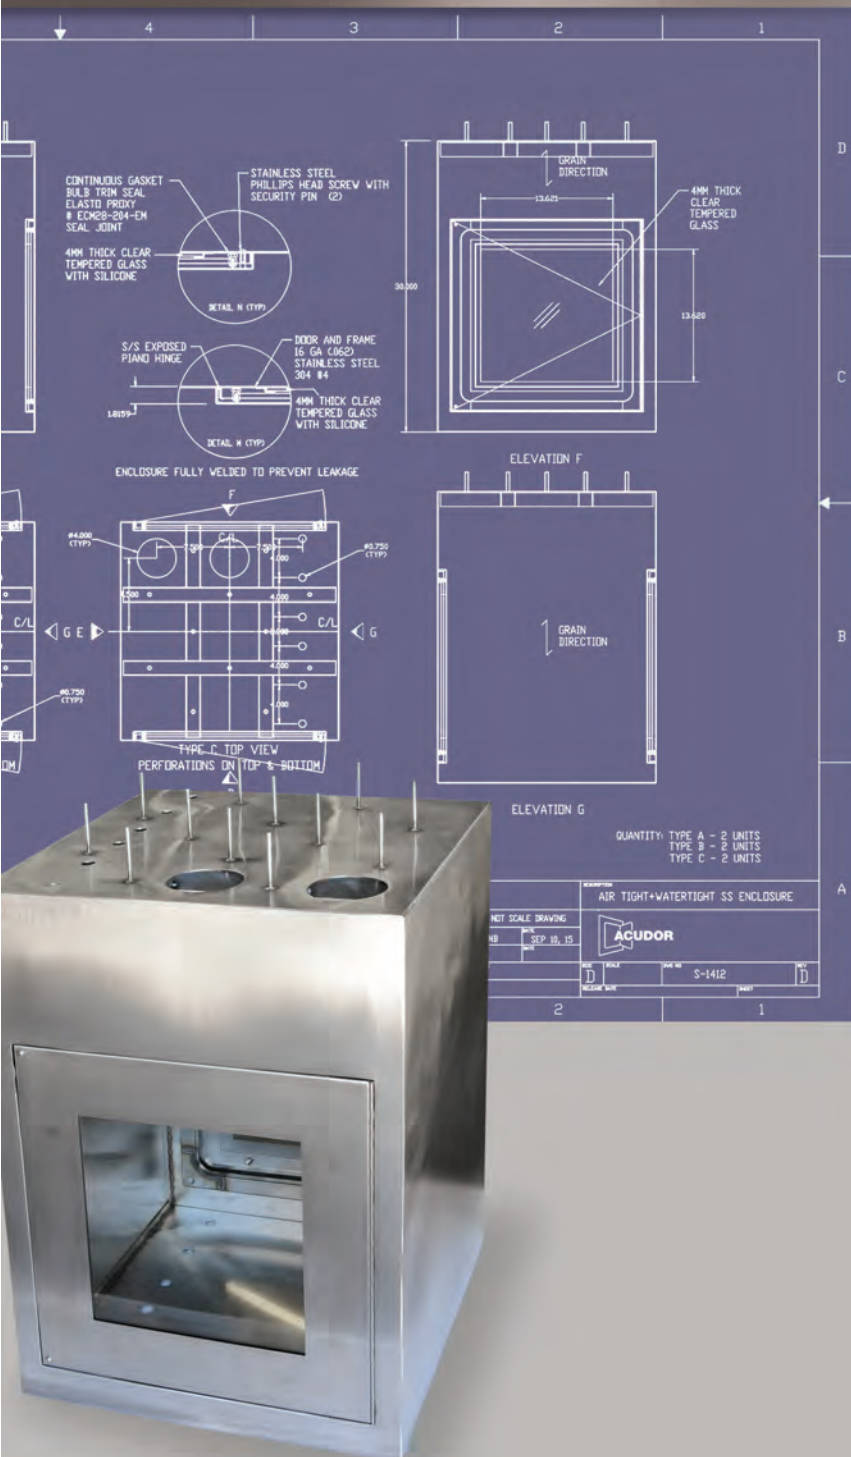

The specific material and functional expectations presented challenges in engineering and manufacturing, which have been skilfully tackled.

P & G GILLETTE, Massachusetts

Product: Ceiling mounted Air-tight + Water-tight Enclosure
Material: 16Ga Stainless Steel 304 grade, Finish: #4 Satin Brush
Vision Panel: 4mm thick Clear Tempered Glass

ACUDOR Access Products

The Acudor brand was established in 1976 and has continually expanded since its inception to include:

- 50 different models of Access Doors
- 30 different models of Roof Hatches & Smoke Vents
- 30 different models of Floor Doors

In addition to having the market's broadest range of standard Access products, 20% of Acudor's output is custom. From a special sized Access Door to a highly engineered, electronically actuated over-sized custom Roof Hatch; Acudor's depth of technical strength and application knowledge is unmatched in the industry.

Acudor is sold internationally with multiple stocking facilities located across North America.

Acudor draws on the resources of **Nelson Industrial Inc.**, owner and manufacturer of the Acudor brand. Founded in 1973, Nelson is headquartered near Toronto, Canada and is one of North America's leading designers and manufacturers of architectural metal products. The industries Nelson serves and products they produce are diverse.
