

#40 2-PIECE EXPANSION JOINT Galvanized Metal Construction

FOR STUCCO AND PLASTER INSTALLATIONS

This 2- piece, male/female, expansion joint is used to accommodate movement in two directions.

Submitted Product	Product Number	Ground Size
	#40	1/2"
	#40	3/4"
	#40	7/8"
Standard Package Lengths are 10-ft.		

Expansion Joints are designed to deal with structural movement within a structure.

DESCRIPTION

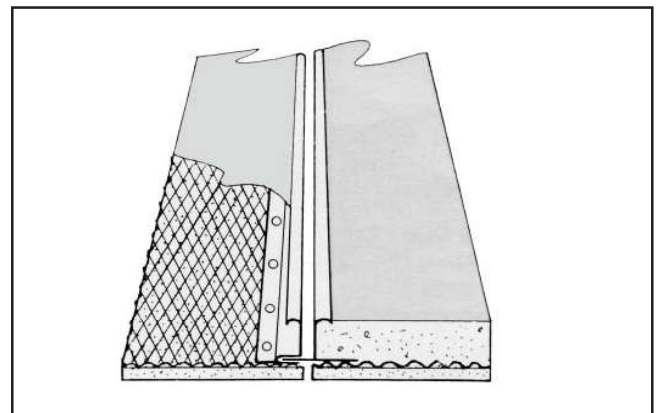

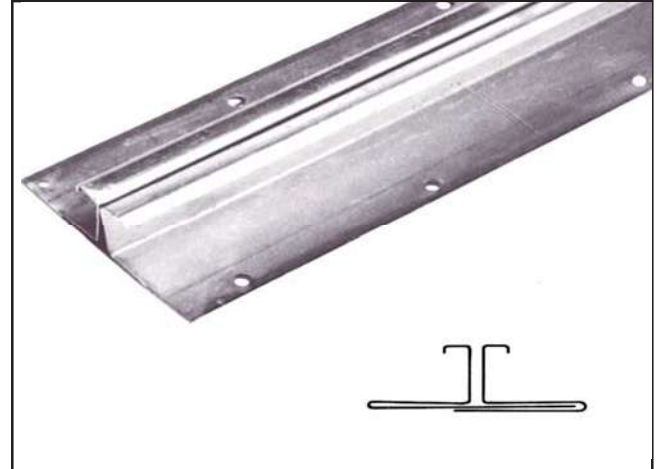

Used at through wall expansions with double studs or where there is a transition from one type of framing to another such as CMU's to wood framing. Joint opening is adjustable from 1/4" to 5/8".

This joint can be orientated and installed in a wall in both the vertical and horizontal direction. Two and three piece joints require extra calking and maintenance at the juncture of the pieces to avoid moisture problems.

MATERIALS

G60 hot dip galvanized sheet steel to ASTM A653 with a minimum thickness 0.0172-inch prior to galvanizing as required by ASTM C1063 and C1861.

AMICO RECOMMENDS THE USE OF ACCESSORIES MADE FROM ZINC ALLOY, PVC AND OR STAINLESS STEEL MATERIALS FOR ALL EXTERIOR APPLICATIONS.

COMPLIANCE CRITERIA

Compliant with the following:

- International Building Code - (IBC)
- International Residential Code - (IRC)
- Florida Building Code (FBC) Building
- Florida Building Code (FBC) Residential
- California Building Code (CBC)
- California Residential Code (CRC)

Made in the United States of America

LEED: both pre and post industrial recyclable content are available – contact the manufacturer.
