ALABAMA METAL INDUSTRIES CORPORATION

AMIGUARD FENCE SYSTEM™

AMIGUARD
PERIMETER SYSTEM

Infinirail based design:

- Continuously splice rail – reduces labor during rail install
- Better Design with improved connection method – resulting in reduced connections of security panels to framework
 - Elimination, 100% reduction, of old style clamps and back straps
 - Up to 50% reduction of nuts and bolts
- Maximized panel sizes – resulting in up to 50% fewer panels that must be installed
- Cleaner most aesthetically pleasing look
- Available in Galvanized and Painted

CHAMELEON

THE HIGH SECURITY CURTAIN WALL SYSTEM

- The ability to utilize fence posts already set in place
- Saves time (up to 40% over other solution) and materials
- Allows you to utilize existing grounding systems in place
- Can quickly increase the security level of an existing fence
- Unlimited security mesh options
- Choice of finish – galvanized or black powder coated

ANC® Composite Fence System™

System Attributes:

- 100% non-conductive, tested to 650 KV – no grounding required
- Stray current non-issue
- Static/flash charge non-issue
- Complete corrosion resistance while combining increased security in an easy to install solution
