LOAD & DEFLECTION TABLES

Explanation of Load Type

U = uniform load (lb/ft²)

D = corresponding deflection (in) resulting from uniform load

C = concentrated load (lb)

D = corresponding deflection (in) resulting from concentrated load

Note:

- All UDL and concentrated loads include a safety factor of 1.67.
- Spans and loads to the right of the bold line, based on loads indicated, may exceed deflections of L/120.
- 2½" channel not shown in tables. Available by special request only.

4 3/4 Inch Wide - 2 Diamond

Note:

- Strut deflection may become a limiting factor on 18" and 24" widths resulting in lower load values as indicated in tables.
- Web stiffeners can be supplied for ends and junctions of planks to even deflection if required.
