Eliminates cost of curbs and excess sealant.

12 sausages per kit

Ideal For Use On:

Pitch Pans

Skylights

Drains

Vent Stacks

Fasteners

Edge Metal

Base Flashing

Term Bars

Lead Repair

LIQUID FLASH™

Permanent DETAIL SEALANT

APPLY USING:

◀ SAUSAGE
GUN
OR
CUT &
SQUEEZE ▶

APPLICATION: Liquid Flash™ can be dispensed manually. Simply cut a small hole at the top of the sausage with a utility knife and squeeze. It may also be applied by using APOC's sausage type caulking gun or other sausage gun. The substrate must be clean and free from grease and oils. Metals must be degreased with a suitable solvent. May be applied with a brush or trowel. Roofing granules may be embedded in top layer. Clean with xylene. For Professional Use Only.

SPREAD RATE & COVERAGE: Contains 12 Sausages per container. Approximately 1 Sausage per penetration.

Dry Mills Coverage (1 Sausage Pack):

1 Pack @ 62.5 mills = Approx. 2.0 sq. ft.
1 Pack @ 125 mills = Approx. 1.0 sq. ft.
1 Pack @ 250 mills = Approx. 0.5 sq. ft.

Dry Mills - Per Case (12 Sausage Packs ≈ 1 gal.):

12 Packs @ 62.5 mills = Approx. 25 sq. ft.
12 Packs @ 125 mills = Approx. 12.5 sq. ft.
12 Packs @ 250 mills = Approx. 6.25 sq. ft.

PERMANENT REPAIR SYSTEM

Step 1: Cut a piece of APOC #483 polyester fabric to extend over and a minimum of 2" past all damaged areas. See specific APOC Detail Sheet for polyester requirements on or around penetrations, cant strips, tie in's or other detail areas.

Step 2: Dispense Liquid Flash™ onto surface, brushing it over and 3-4" past the damage or area to be sealed. Use one sausage for every one square foot. Masking tape can be used to keep detail work looking professional.

Step 3: Immediately embed polyester fabric over damaged area and into wet sealant. Brush polyester to eliminate all wrinkles, voids, blisters, etc.

NOTE: APOC Incredible™ Fleece-Top™ Tape may be used in lieu of step 1 & 2.

Step 4: Seal the top of the polyester with an additional application of Liquid Flash™ Detail Sealant at one sausage per each one half square foot over the top of the reinforcement and a minimum of one half inch past the edge of the polyester. Surface should be completely smooth and the fabric pattern should not be visible.

Step 5: Allow to cure and coat completed area with APOC acrylic or silicone coating.

Best Used With Incredible™ Fleece-Top™ Tape

- ▶ 50 ft. Long Rolls
- ▶ 3 Sizes: 4", 6" or 12"
- ▶ Heavy Duty All Purpose Tape and Sealant
