Color Chart

AQUAFIN-2K/M Standard Colors

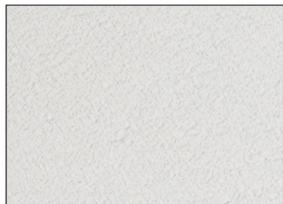

Standard Gray (non decorative)

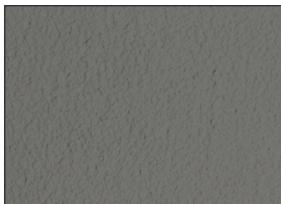

Standard White

Adobe Buff

Sable

Platinum Gray

Steel Gray

Colors above serve only as a visual guide for initial selection of color. It is important to note that the colors seen will vary depending on monitor and printer settings. Additionally, AQUAFIN-2K/M contains aggregate which results in a textured surface. Further, AQUAFIN-2K/M is a cement based product, and due to natural variations in raw materials, color shade can vary from pail to pail. If a uniform "paint like" color finish is desired, Aquafin recommends applying a colored sealer or breathable acrylic paint over the finished application of AQUAFIN-2K/M. Approve all colors and textures prior to application as actual colors and textures may vary. All colors are mixed with AQUAFIN-2K/M Base White (not pictured), when AQUAFIN-2K/M Base White is mixed without adding pigment the resulting color is a dull white. Custom colors available upon request, however additional fee's apply. Please contact Aquafin Customer Service with questions.
