Injection Grouting

Product Guide:

Chemical Grouting

Chemical Injection Resins

Aquafin offers a complete line of chemical injection grouts to ensure your projects needs are covered! Safety and environmentally friendly products are always a top priority, which is why our injection products are based on MDI's and do not contain solvents.

Polyurethane

InjectPro-SLV

Super low viscosity, hydrophobic injection resin with superior sealing characteristics

- Not subject to shrinkage due to wet/dry cycles
- Pumped as a single component
- Can expand more than 25 times initial volume
- Very low viscosity (~100 cps) allows injection into hairline and micro cracks

InjectPro-CUT

Rigid, durable, hydrophobic injection resin for filling leaking joints and cracks in concrete, as well as large voids in gravel layers and rock fissures

- Not subject to shrinkage due to wet/dry cycles
- Pumped as a single component
- Can expand more than 25 times initial volume

InjectPro-LV

Low viscosity, high elongation, hydrophobic injection resin with superior sealing characteristics

- Not subject to shrinkage due to wet/dry cycles
- Pumped as a single component
- Can expand more than 20 times initial volume
- Low viscosity allows injection into hairline cracks

InjectPro-SuperFAST

Fast reacting, two component, expansive hydrophobic polyurethane grout

- 100% solids, non-flammable
- Hydrophobic - for wet and dry environments
- Very fast reaction time! ~30 seconds
- Can expand more than 25 times initial volume
- Excellent resistance and durability

InjectPro-SEAL

Low viscosity, hydrophilic injection resin for filling leaking joints and cracks in concrete and large voids in gravel layers and rock fissures

- Hydrophilic - "seeks" water deep into wet cracks
- Can be pumped as a single component, or as a two component system with water
- Excellent tensile and adhesion properties
- Can expand more than 25 times initial volume

InjectPro-61

Hydrophobic, potable water approved, polyurethane grout

- NSF/ANSI Standard 61 certified
- Zero VOC's - meets LEED criteria
- 100% solids, non-flammable
- Hydrophobic - for wet and dry environments
- Pumped as a single component
- Can expand more than 30 times initial volume
- Adjustable reaction times

Acrylate

InjectPro-PM3811 Series

Low viscosity, high elongation, hydrophilic acrylate injection resins with superior sealing characteristics

- Environmentally friendly
- Adjustable curing times
- Waterproof, stabilize soil and fill voids, crack injection

InjectPro-PM3811-SoilStabilizer

Excellent penetration into various substrates and soil

InjectPro-PM3811-Flex

Elongation up to 250%, designed specifically for applications subject to movement

InjectPro-PM3811-Fast

Very fast setting (20 seconds - 2 minutes), excellent for stopping high active water flow, +250% elongation

InjectPro-PM3811-UltraSeal

Excellent for all crack injection applications. Perfect for areas subject to wetting/drying cycles, does not shrink in dry environments.

InjectPro-PM3811 Series acrylates penetrate deep into soils to solidify the substrate and adjustable curing times allow for better control over depth of penetration.

Acrylates: A "greener" and "safer" alternative to acrylamides.

Aquafin's full line of acrylates provide non-toxic solutions for many grouting applications including soil stabilization, curtain wall grouting and crack sealing. The ultra low viscosity allows for permeation into many types of soil and fine hairline cracks. The InjectPro-PM3811 Series of acrylates have zero VOC's, and no fumes so working in confined areas is safer for crews and clean up is always safe and easy! Take a closer look at the full line of InjectPro-PM3811 acrylates, designed to stop water and stabilize soil for all scopes of work!

AQUAFIN Inc. was founded in January 1989 and is a member of the SCHOMBURG Group.

AQUAFIN offers a full range of products to repair, protect, waterproof and vaporproof concrete, masonry, brick, and stone substrates.

In addition to providing the highest quality products we are dedicated to supporting our clients with technical expertise and practical know how gained over many years of on-the-job experience.

AQUAFIN products are for professional use only, not for sale to or use by the general public.
