## Cementitious corrosion protection and bonding agent

# AQUAFIN® REBAR PRIMER/BOND-CI

### Description/Benefits:

- One part - mixes with water
- Extended pot life and contact time
- Low VOC's - solvent free
- Resistant to penetration of water and chlorides
- Excellent workability with long pot life
- Easy to use on vertical and overhead areas
- Extended open time allowing for repair mortars up to 3 days after application
- Can be applied by brush or spray
- Active corrosion inhibitor
- Available in 10 lb. and 22 lb. pails
- Compare to: Sika Armatec 110, Euclid DURALPREP AC, BASF Emaco P24, Mapei Mapefer 1K

### Typical Applications:

- As an anti-corrosion, protective coating for steel rebar in concrete restoration
- As a bonding agent for concrete repair mortars or fresh concrete
