

VAPORTIGHT COAT SG-2 & SG-3

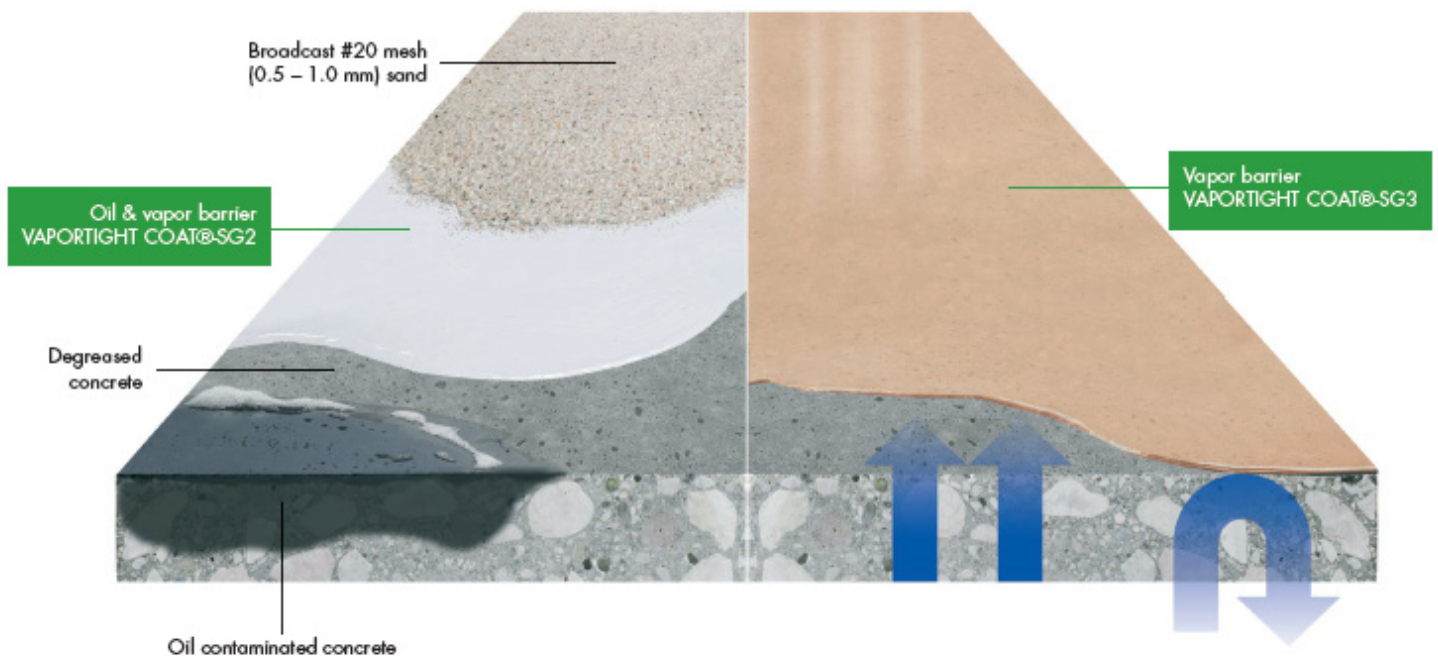

Moisture Vapor Reduction Systems

Two unique products...both single-coat systems for concrete slabs on, below or above grade, such as:

- Industrial/retail facilities
- Office buildings
- Hospitals and schools
- Parking Garages
- Concrete roof decks
- Warehouses and more!

Advantages:

- One coat application
- Moisture tolerant, can be applied to damp substrates
- High chemical resistance
- Can be applied to 5 day old concrete
- Withstands MVER up to 25lbs, RH up to 100% and pH 14
- Provides good bonding for additional top coatings such as adhesives, epoxies, self levelers, urethane coatings, VCT, carpet, roofing membranes, etc.
