**Effects of long-term (chronic) exposure**

- : Prolonged skin contact may cause skin irritation.

## SECTION 5 – FIRE FIGHTING MEASURES

**Fire hazards/conditions of flammability**

- : Not flammable under normal conditions of use. Closed containers may rupture if exposed to excess heat or flame due to a build-up of internal pressure.

**Flammability classification (OSHA 29 CFR 1910.1200 and WHMIS 2015)**

- : Non-flammable

**Suitable extinguishing media**

- : Dry chemical, carbon dioxide and foam, water spray.

**Special fire-fighting procedures/equipment**

- : Firefighters should wear proper protective equipment and self-contained breathing apparatus with full face piece operated in positive pressure mode. Move containers from fire area if safe to do so. Water spray may be useful in cooling equipment exposed to heat and flame. After fires have been extinguished, carefully clean all equipment and surfaces exposed to fumes.

**Hazardous combustion products**

- : vinyl acetate; acetic acid; Aldehydes; Carbon oxides.

## SECTION 6 – ACCIDENTAL RELEASE MEASURES

**Personal precautions**

- : Wear chemically resistant personal protective equipment during cleanup. Restrict access to area until completion of clean-up. All persons dealing with clean-up should wear the appropriate chemically protective equipment. Product may create a slip hazard when spilled. Refer to Section 8 for additional information on acceptable personal protective equipment.

**Environmental precautions**

- : Do not allow product to enter waterways. Do not allow material to contaminate ground water system.

**Spill response / clean-up**

- : Ventilate area of release. Stop spill or leak at source if safely possible. Contain material, preventing it from entering sewer lines or waterways. Using shovels or squeegees, gather up spilled material and place in suitable container for later disposal (see Section 13). Notify the appropriate authorities as required.

**Prohibited materials**

- : None known.

**Special spill response procedures**

- : This product contains trace amounts of vinyl acetate, which has a CERCLA Reportable Quantity of 5000 lbs. Due to the low level of vinyl acetate in this product, spills or releases of this product will not exceed the Reportable Quantity, and therefore it is not necessary to notify the U.S. EPA for spills. For advice on chemical spills with this product, call the emergency number listed in Section 1.

Training the workers on the potential health hazards associated with product vapor is important. Secondary inhalation exposures could occur when cleaning equipment, or when removing or laundering the clothing. Do not breathe the vapor or mist. Avoid contact with skin, eyes and clothing. Keep away from oxidizing materials. Keep containers tightly closed when not in use. Wash thoroughly after handling.
- Storage requirements** : Store in a cool, dry, well-ventilated area. Do not store near any incompatible materials (see Section 10). Storage area should be clearly identified, clear of obstruction and accessible only to trained and authorized personnel.
- Incompatible materials** : See Section 10.
- Special packaging materials** : Always keep in containers made of the same materials as the supply container. Do not reuse empty container without commercial cleaning or reconditioning
