## FACETED INSTALLATION

MetalWorks™ Tegular faceted panels

MetalWorks™ Tegular faceted panels

## FACETED PERIMETER DETAILS

Perimeter conditions will require custom treatments. Moldings will need to be bent to match the angle of the ceiling where it contacts the walls at the straight sides, and will need to be cut to align with the panel segments on the faceted sides. It is recommended to have these installations tie into a wall or drywall bullhead rather than to attempt to create a floating ceiling condition.

## SUSPENSION SYSTEMS

Prelude® and Suprafine® suspension systems are available in coordinating colors. All other suspension systems are available in standard White only. Other colors available as special order.

## PHYSICAL DATA

### Material

Electrogalvanized Steel – 0.021" thickness

### Surface Finish

Factory-applied powder-coated finish (post-coated for color). Factory-applied powder-coated finish (post-coated on both sides). Effects finish on face only.

Custom colors also available. Contact TechLine for custom color matching requests at 1 877 276-7876.

### Fire Performance

Class A: ASTM E84 and CAN/ULC S102. Flame Spread Index 25 or less. Smoke Developed Index 50 or less.

### Acoustical Performance

CAC testing conducted using Prelude® XL\* for 15/16" edge detail and Silhouette® for 9/16" edge detail.

### ASTM E1264 Classification

Fire Class – Class A

Unperforated – Type XX, Pattern G

Perforated – Type XX, Pattern C

### Installation Consideration

For Tegular faceted installations, a Faceted Hold-Down Clip must be used, which will limit accessibility. If accessibility is required in a faceted application, use Vector® panels.

For information about faceted applications with square Tegular panels in 15/16" suspension system, refer to installation instructions on our website at [armstrongceilings.com/installation](http://armstrongceilings.com/installation).

### Seismic Restraint

MetalWorks Tegular panels have been engineered, tested, and approved for application in all seismic areas when installed per Armstrong Ceilings installation instructions.

### Cleaning and Disinfecting

Cleaning and CDC recommended disinfecting options available on [armstrongceilings.com/cleaning](http://armstrongceilings.com/cleaning)

### FAST134 Program Considerations

Size of Job Matters: Big jobs, over 2500 SF or 50 pieces for shapes/vertical elements will have longer lead times.

Location Matters: Transit time not included. We are ready to ship in 1 week on FAST1 items. However, transit to the states west of Wyoming may add time.

Distributor Truck Schedule Matters: We rely on distribution to help move products around the country. When speed matters, work with your local distributor to ensure FAST134 service.

Stock vs Made-to-Order Matters: FAST3 & FAST4 items are made-to-order and will ship direct to distributor. FAST1 (stocked items) will go through distribution and depend on distributor truck schedules.
