

Part of the FrameAll™ Drywall Grid family of products, ShortSpan® Framing System is a pre-engineered solution that installs faster than traditional methods by eliminating hanger wires for spans up to 9' (ShortSpan tees every 16" O.C.) and reducing material and labor on spaces 14' wide or less.

KEY FEATURES AND BENEFITS

- **FASTER:** Eliminates hanger wires and additional cross tees for spans up to 9'0"
- **EASIER:** Eliminates measuring and screwing with the installation combination of LAM (Locking Angle Molding) and ShortSpan tees
- **BETTER:** Requires fewer people on the jobsite, reducing man-hours. Use the updated time, material, and labor savings calculator to compare savings vs. traditional framing
