DESIGNFLEX® CEILING SYSTEMS

Imagine a ceiling so completely fresh and unusual it seems practically reinvented. DesignFlex® Ceiling Systems mean a shift from traditional 2' x 2' and 2' x 4' modules to new design patterns using triangles, parallelograms, and trapezoids plus new sizes in squares and rectangles. Classic white, subtle pops of color, or bold color palettes can personalize your space. Choose from a range of materials – from mineral fiber and fiberglass to wood and metal.

DesignFlex panels offer a wide variety of panel materials, shapes, sizes, and colors to create hundreds of palettes and dozens of patterns – all made-to-order and ready to ship in just 3 weeks – slightly

longer for metal and wood panels.

DESIGNFLEX®
A New World of Choice
for Ceiling Systems

**Only from Armstrong
Ceiling Solutions.**

SUSTAIN®
High Performance
Sustainable
Ceiling Systems

**TOTAL
ACOUSTICS®**
Sound Absorption (NRC)
+ Sound Blocking (CAC)

Make it Yours!

The online pattern gallery shows patterns in a variety of looks, including full color, and with 3D shapes.

In this space, the designer mixed Ultima® Shapes for DesignFlex® in Pattern SH-15, with minor modification of the trapezoids from 75 to 60 degrees via our fast and accurate ProjectWorks® service.

▲ SH-17 pattern shown in 5 different color palette options

Choose a pattern from the gallery and use a pre-designed color palette or create your own. For more details, visit the pattern gallery.

PROJECTWORKS®

Fast and accurate ceiling design service.

Ceiling Design & Pre-construction Services

- Faster, easier, more accurate estimates
- DesignFlex®, MetalWorks™ Torsion Spring Shapes, and other specialty ceilings included in ProjectWorks®
- Submit your RCP in AutoCAD® or a Revit® file with included 2D RCP, and we'll create complete drawing details, a comprehensive quote, and a line item bill of materials

Faster, More Efficient Design for Specifiers

Complete Design-to-Installation Package:

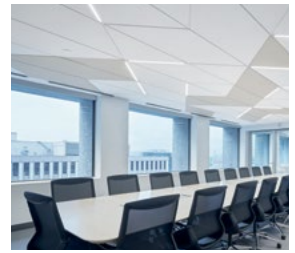

- Quick turnaround time for design
- Lighting and HVAC integration with Armstrong partners' components
- Automated drawing details for suspension systems and accessories
- Custom color application for panels, suspension systems, and perimeter trims
- Budget material pricing
- Integrates design through installation

Faster, Easier Estimating & Takeoffs for Contractors

- Overall RCP dimensioned layout of Armstrong Ceiling Solutions in the project space
- Complimentary pre-construction drawings and takeoffs for your complex and large-scale projects
- Color Plan Layout for ease of visualization when multiple colors are included
- Panel Schedule showing exactly which panels are installed in each location throughout the project space
- Suspension Schedule calls out each standard tee and main beam location
- Hub Schedule shows detailed grid intersections, clips, and perimeter installation
- Complete pre-construction takeoffs including quote with line item bill of materials
- Solve bidding challenges on projects using our most popular mineral fiber options
