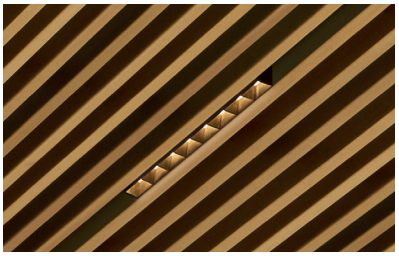
WoodWorks Grille – Classics Custom Installation – in Dark Cherry

These warm, natural wood ceilings offer installation flexibility and a variety of design options.

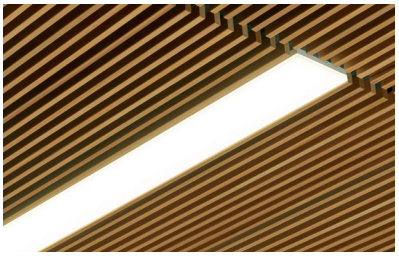
KEY SELECTION ATTRIBUTES

- new • 10 new standard finishes on solid poplar are tinted to replicate naturally occurring wood tones
- new • Panels are part of the Sustain® portfolio and meet the most stringent industry sustainability compliance standards today
- new • Coordinating solid wood trims in 4" and 6" depths
- The natural warmth of wood can contribute to biophilic designs and building certification standards like the WELL™ v2 "Nature and Place" feature
- Select products included in the FAST134 program – ready to ship in 4 weeks or less
- Installation with dowel or flat backer, or backer and dowel combination
- Integrated downlighting solutions from USAI® Lighting sit perfectly flush with the panel face for a sleek visual
- Integrate linear lights seamlessly with the Integrated Light Connection Clip and lights from BASO™ Lighting
- Lighting solutions are certified for fit and finish and engineered to be supported by standard Armstrong suspension systems for use in all areas, including seismic D, E, F zones
- CleanAssure™ family of products – includes disinfectable panels, suspension systems, and trim
- Custom slat sizes and finishes available for every project
- Install in the ceiling, on the wall, or create ceiling-to-wall transitions
- FSC® certified wood options available as a premium quoted option
- Made in the U.S.A. of domestic and global content
- Build America, Buy America (BABA) Act compliant

Now, Lighting Integration Made Easy



DOWNLIGHTING: WoodWorks Grille – Classics panel with USAI® Micro™ downlight fixture. Integration details at armstrongceilings.com/downlighting



LINEAR LIGHTING: WoodWorks Grille – Classics panels in Maple with 5-1/4" x 95" linear light fixture. Integration details at armstrongceilings.com/linearlighting

NOTE: See WoodWorks® Grille installation instructions for details on faceted and seismic installations at armstrongceilings.com/woodworks

PHYSICAL DATA

Material
Dowel, Slats, Backers, and Tegular panels – solid Poplar.

Surface Finish
Clear or tinted semi-gloss coating on all finishes except White (GWH), which has a lacquer finish.

Fire Performance
Class C: ASTM E84 surface burning characteristics. Flame Spread Index 200 or less. Smoke Developed Index 450 or less.

Fire performance will vary between wood species.

Flame stop coating is available as a custom option. Contact ASQuote@armstrongceilings.com for details.

These panels, as with other architectural features located at the ceiling, may obstruct or skew the planned fire sprinkler water distribution pattern, or possibly delay or accelerate the activation of the sprinkler or fire detection systems by channeling heat from a fire either toward or away from the device. Consult a fire protection engineer, NFPA 13, and local codes for guidance where automatic fire detection and suppression systems are present.

Application Considerations
Variation among panels may occur due to the natural characteristics of the wood and grain.

Design Considerations
Custom slat and panel sizes available. For installations where slat alignment is critical, please see the WoodWorks Grille – Forté product line.

Backer & Dowel
For slat heights over 5", both dowels and backers are required for stability. Backer height is 1/2". Panel backers are black. Custom backer colors available.

Infill Panel Use
If no infill panel is used, unfinished parts of the suspension system and Axiom® trim will be visible from below.

Site Conditions
It is very important that panels are climatized prior to installation. Relative humidity between 25% and 55%, and temperatures between 50°F and 86°F, must be maintained.

Installation Consideration
When junction accessory is not used, the result will be a 1" gap between slat lengths.

Seismic Restraint
WoodWorks Grille – Classics panels have been engineered, tested, and approved for application in all seismic areas when installed per Armstrong Ceilings installation instructions.

Design & Pre-Construction Service
For complimentary design and pre-construction assistance, contact ProjectWorks® or visit armstrongceilings.com/projectworks

Cleaning and Disinfecting
Cleaning and CDC approved disinfecting options available on armstrongceilings.com/cleaning

FAST134 Program Considerations
Size of Job Matters: Big jobs, over 2500 SF or 50 pieces for shapes/vertical elements will have longer lead times.

Location Matters: Transit time not included. We are ready to ship in 1 week on FAST1 items. However, transit to the states west of Wyoming may add time.

Distributor Truck Schedule Matters: We rely on distribution to help move products around the country. When speed matters, work with your local distributor to ensure FAST134 service.

Stock vs Made-to-Order Matters: FAST3 & FAST4 items are made-to-order and will ship direct to distributor. FAST1 (stocked items) will go through distribution and depend on distributor truck schedules.

Warranty
Details at armstrongceilings.com/warranty

Weight
Refer to Visual Selection chart.

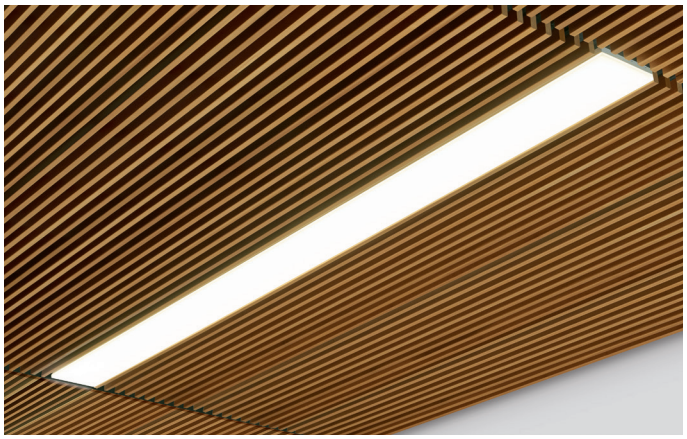
WOODWORKS® Grille – Classics

Linear Lighting



WoodWorks Grille – Classics panels in Maple with 5-1/4" x 95" linear light fixture

Seamlessly integrate linear light fixtures from BASO™ Lighting with standard or made-to-order WoodWorks® Grille – Classics Backer-only panels using Integrated Light Connection Clips that suspend lights directly from the suspension system. This eliminates the need for independent support of the fixture or modification of the suspension system.

KEY SELECTION ATTRIBUTES

- Engineered and tested clip and suspension system seamlessly integrate lighting with grid
- Install lights seamlessly for WoodWorks Grille Backer-only Panels
- Low-profile, pre-engineered light fixture in coordinating 2", 3-1/4", and 5-1/4" widths from BASO for a flush, sleek visual
- Approved for use in all seismic categories

DESIGN CONSIDERATIONS

- Length of lights are designed to coordinate with the length of panels
- Lights must run parallel with slat direction and are not for use in perimeter panels
- Reveal between light and slats will coordinate with the reveal from slat to slat
- Modified panels are required to leave outside slats intact (slats along edges cannot be removed)
- Coordination between ceiling contractor and electrician is required for installation

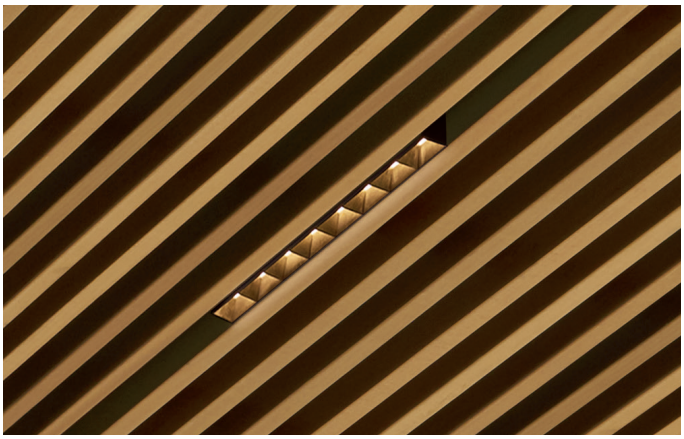
WOODWORKS® Grille – Classics

Downlighting



WoodWorks Grille – Classics panels with USAI Micro for WoodWorks – Vertical Slats light fixture

Seamlessly integrate downlight fixtures from USAI® Lighting with standard WoodWorks® Grille – Classics Backer & Dowel or Backer-only panels. Attach lights directly from the suspension system, eliminating the need for independent support of the fixture or modification of the suspension system.

KEY SELECTION ATTRIBUTES

- Engineered and tested to seamlessly integrate lighting fixtures with grid
- Install lights seamlessly for WoodWorks Grille – Classics Backer & Dowel and Backer-only Panels. Custom Dowel-only solutions are possible through ASQuote.
- USAI Lighting fixtures provide different downlighting styles for design flexibility
- Approved for use in all seismic categories

DESIGN CONSIDERATIONS

- Lights are designed to sit flush with the face of the WoodWorks panels
- Coordination between ceiling contractor and electrician is required for installation
