Ceiling & Wall Systems

Reach New Heights of Sustainability

Sustain®

Meet Sustainability Goals Your Way

No matter what sustainability or design challenges you face, Armstrong® Sustain® portfolio makes your decisions simpler by offering the largest forward-thinking portfolio of healthy ceiling and wall solutions with verified material transparency, and low-embodied carbon*.

In an industry where meeting evolving sustainability goals can be an increasingly complex equation, Sustain strives to make your decisions simple.

FeltWorks® Blades
Ebbs and Flows

* Embodied carbon reduction based on EC3 baseline for ceilings. The EC3 tool is managed by and available through [Building Transparency](#).

Cut Carbon

Minimize overall project environmental impact by selecting leading-edge solutions from the broadest portfolio of low-embodied carbon ceiling and wall products that provide carbon reductions across a product's entire lifecycle.

Leading-edge solutions that reduce carbon across a product's entire life cycle:

- Broadest portfolio of low-embodied carbon solutions
- By focusing on embodied carbon, we can deliver solutions to minimize the overall project's impact
- Deeply committed to its own sustainability goals, Armstrong is constantly working to innovate and add new solutions

USAI® Micro™ downlights

Decisions Simplified

The Sustain® portfolio makes selecting ceiling and wall solutions that meet sustainability criteria easier and less time consuming at scale. You'll find solutions for every design goal, with easy-to-specify products that clearly communicate transparency and optimize information.

Reduce Waste

Since 1999, the nation's first ceilings recycling program has diverted over 200 million square feet of old ceiling materials from going to landfills. The Armstrong Ceilings Recycling Program provides an efficient solution to reduce construction waste and embodied carbon on commercial renovation projects.

The program helps meet waste-reduction targets, and we provide a diversion savings calculator to directly measure the resulting environmental impact and savings.
