Prelude 15/16" Suspension System
#5925
WoodWorks Linear Solid Wood panels in Antique Oak on Prelude® XL® 15/16" suspension system
Standard linear solutions with the beautiful color variation and graining of solid wood with integrated lighting options.

KEY SELECTION ATTRIBUTES

(new) · Standard finishes on solid poplar are tinted to replicate naturally occurring wood tones

(new) · Panels are part of the Sustain® portfolio and meet the most stringent industry sustainability compliance standards today

· FSC® certified wood available as a premium quoted option

(new) · Get total noise control and design flexibility with Total Acoustics® ceiling panels: NRC + CAC = Total Acoustics

· The natural warmth of wood can contribute to biophilic designs and building certification standards like the WELL™ v2 "Nature and Place" feature

· Two plank widths – nominal 3" and nominal 5"

· Installation with backer clip provides semi-accessibility, improves alignment and allows for adjustment during install (Recommended method for repeated access)

· Screw installation method offers a fast install using familiar tools and provides semi-accessibility

· Lighting solutions are certified for fit and finish and engineered to be supported by standard Armstrong suspension systems for use in all areas, including seismic D, E, F zones

· Integrated downlighting solutions from USAI® sit perfectly flush with the panel face for a sleek visual

· Integrate linear lights seamlessly with the Integrated Light Connection Clip and lights from Backlight™ srl and XAL®

· Create continuous looks and clouds with solid wood trim

· Complete standard system from one manufacturer

WOODWORKS® Linear

Solid Wood Panels

FINISH RANGES ON SOLID POPLAR

Our tinted finishes allow the natural character of the poplar to shine through. The images here reflect the visual range that is likely within our product. Installers will want to lay out panels before installing to achieve preferred aesthetic.

Finish Ranges on Solid Poplar
Bleached Grey (GBG)
Classic Grey (GCG)
Carbon Grey (GCB)

Rich Mahogany (GRY)

Antique Oak (GAO)

Red Oak (GRK)

English Chestnut (GEC)

Golden Maple (GGM)

Natural Walnut (GWN)

Warm Oak (GWO)

Forest Walnut (GFW)

CUSTOM FINISHES

Custom Wood Species and Finishes Available

Made-to-order, custom backer colors available.

LEGACY FINISHES
Maple (GMP)

Light Cherry (GLC)

Dark Cherry (GDC)

White (GWH)*

Due to printing limitations, shade may vary from actual product.
* Painted White finish is not included in the Sustain® portfolio.

PHYSICAL DATA

Material
Solid wood (poplar)

Surface Finish
Clear or tinted semi-gloss coating on all finishes except White (GWH) which has a lacquer finish.

Fire Performance
Class C: ASTM E84 surface burning characteristics. Flame Spread Index 200 or less. Smoke Developed Index 450 or less.

Flame stop coating is available as a custom option. Contact ASQuote@armstrongceilings.com for details.

WoodWorks Linear Solid Wood panels, as with other architectural features located at the ceiling, may obstruct or skew the planned fire sprinkler water distribution pattern, or possibly delay or accelerate the activation of the sprinkler or fire detection systems by channeling heat from a fire either toward or away from the device. Designers and installers are advised to consult a fire protection engineer, NFPA 13, and local codes for guidance where automatic fire detection and suppression systems are present.

Application Considerations
Variation among panels may occur due to the natural characteristics of the wood and grain.

Design Considerations
Relative humidity between 25% and 55%, and temperature between 50° F and 86° F must be maintained.

Installation Consideration
System is designed to have a 1" gap between panels.

Seismic Restraint
WoodWorks Linear Solid Wood panels have been engineered, tested, and approved for application in all seismic areas when installed per Armstrong Ceilings installation instructions.

Cleaning and Disinfecting
Cleaning and CDC-approved disinfecting options available on armstrongceilings.com/cleaning

Warranty
Details at armstrongceilings.com/warranty

Weight (Bulk Packaged)

Armstrong® World Industries

WOODWORKS® – Standard

Seamlessly integrate linear light fixtures from Backlight™ srl and XAL® with
standard or made-to-order WoodWorks® Linear Solid Wood panels using Integrated Light Connection Clips that suspend lights directly from the suspension system. This eliminates the need for independent support of the fixture or modification of the suspension system.

KEY SELECTION ATTRIBUTES

- Engineered and tested clip and suspension system seamlessly integrate lighting with grid
- Install lights seamlessly for WoodWorks Linear Solid Wood panels for interior applications
- Low-profile, pre-engineered light fixtures in coordinating 3-1/4" and 5-1/4" widths from Backlight srl and XAL for a flush, sleek visual
- Approved for use in all seismic categories

DESIGN CONSIDERATIONS

- Length of lights are designed to coordinate with the length of panels
- Lights must run parallel with panel direction and are not for use in perimeter panels
- Modified panels must be screw-attached to the suspension system. Reveal between light and panels will coordinate with the reveal from panel to panel
- Coordination between ceiling contractor and electrician is required for installation

downlighting

WoodWorks Linear Solid Wood panels with USAI BeveLED Mini for WoodWorks light

Seamlessly integrate downlight fixtures from USAI® with standard WoodWorks® Linear Solid Wood panels. Suspend lights directly from the suspension system, eliminating the need for independent support of the fixture or modification of the suspension system.

KEY SELECTION ATTRIBUTES

· Engineered and tested to seamlessly integrate lighting fixtures with grid
· Approved for use in all seismic categories

DESIGN CONSIDERATIONS

· Lights are designed to sit flush with the face of the WoodWorks panels
· Modified panels must be screw-attached to the suspension system
· Coordination between ceiling contractor and electrician is required for installation
