WoodWorks Vector 24" × 48" panels in Constants™ Walnut on heavy-duty Prelude® XL® 15/16" suspension system

Fully accessible wood panels are available in multiple options for acoustical and aesthetic needs.

KEY SELECTION ATTRIBUTES

- Vector® edge detail provides safe and secure downward accessibility without tools and narrow reveal visual (1/4")
- Standard veneers feature various species and cuts for beautiful wood visuals
- ASTM E84 Class A Fire Performance

- The natural warmth of wood can contribute to biophilic designs and building certification standards like the WELL™ v2 "Nature and Place" feature
- Select products included in the FAST134 program – ready to ship in 4 weeks or less

- Create upturns for continuous visuals and clouds with WoodWorks® trim
- Acoustical fleece backing for improved sound absorption
- Installation with minimum plenum clearance

- Shorter lead times and lower cost than custom millwork
- CleanAssure™ family of products – includes disinfectable panels, suspension systems, and trim
- USDA Biobased Content: 100%
- FSC® certified wood available as a premium quoted option
VENEER CUTS

Different cuts of a log will yield different graining visuals. Choose your veneer to achieve your desired look.
Plain Sliced
Produces the well known cathedral or loop-grain effect.
Quarter Sliced
Produces a striped, often straight-grain effect.

Rift Sliced
Produces a tight, linear grain along the entire length of the veneer.

6408_ _ _		WoodWorks® 3/4" x 300" Edgebanding Coordinating Faux Wood	No	No	25 LF

Reference Price List for minimum order quantities.

◆ When specifying or ordering, include the appropriate 3-letter color suffix that coordinates with your WoodWorks ceiling (e.g. 6408 N W M).
* If replacement clips are needed, order Item 6041 (quantity 100 PCS/CTN).

** Stabilizer bars are required if grid is not attached to perimeter with GCWA or BERC2.

VECTOR PANEL INSTALLATION DETAILS
Step 1: Fully insert the deepest kerf of edge "A", the access kerf, onto the exposed grid flange.
Step 2: Raise the "B" edge of the panel, the registration kerf, into the grid opening until the kerf lines up with the grid flange.
Step 3: Slide the panel so that the registration kerf on edge "B" engages the grid flange. Ensure that the access kerf on edge "A" drops down into the correct position.

PHYSICAL DATA

Material
Fire-rated particle board (FRPB) with real wood veneers. Vertical Grain Fir (NVF) is FRPB with a reconstituted veneer.

Surface Finish
Clear or tinted semi-gloss coating

Fire Performance
Class A: ASTM E84 surface burning characteristics. Flame Spread Index 25 or less. Smoke Developed Index 50 or less.

CAN/ULC S102 surface burning characteristics. Flame Spread Rating 25 or less. Smoke Developed Classification 50 or less.

ASTM E1264 Classification
ASTM E1264 Type XX - Fire Class A

Primary (Embodied) Energy
See all LCA information on our EPDs.

Application Considerations
Variation among panels may occur due to the natural characteristics of the wood and grain.

It is very important that WoodWorks panels are climatized prior to installation. Relative humidity between 25% and 55%, and temperatures between 50°F and 86°F, must be maintained throughout the life of the product.

Design Considerations
All perforated panels are standard with fleece attached. Panels without fleece must be specified.

Different panel sizes should not be installed together. Perforated border on 24" x 72" panels are different than other panel sizes.

Vector safety clips included with panels may be visible through panel perforations.

Specification Consideration
Attention: For FSC-certified wood products to maintain their CoC certification, products must be sold to a CoC-certified distributor or directly to the installing contractor. Failure to do so breaks the CoC.

Seismic Restraint
WoodWorks Vector panels have been engineered, tested, and approved for application in all seismic areas when installed per Armstrong Ceilings installation instructions.

Cleaning and Disinfecting
Cleaning and CDC-approved disinfecting options available on armstrongceilings.com/cleaning

FAST134 Program Considerations
Size of Job Matters: Big jobs, over 2500 SF or 50 pieces for shapes/vertical elements will have longer lead times.

Location Matters: Transit time not included. We are ready to ship in 1 week on FAST1 items. However, transit to the states west of Wyoming may add time.

Distributor Truck Schedule Matters: We rely on distribution to help move products around the country. When speed matters, work with your local distributor to ensure FAST134 service.

Stock vs. Made-to-Order Matters: FAST3 & FAST4 items are made-to-order and will ship direct to distributor. FAST1 (stocked items) will go through distribution and depend on distributor truck schedules.
