Multi-Purpose™ Panels

Did You Know?

Wind-Lok™ Fastening System

The Multi-Purpose Panels are structural panels with concealed fasteners that can be installed on open framing as well as to a solid substrate. Its Wind-Lok® attachment (positive fastening, without clips) saves time and money, while providing a variety of designs and looks.

The panels are available with smooth or stucco embossed texture, in aluminum, steel, copper, and zinc.

Multi-Purpose Panels are used for siding applications on commercial and residential projects and in limited roofing applications.

Features:

- Concealed fasteners
- Available in aluminum, steel, copper and zinc
- Easy to install
- Versatile: Mix and match the 17 panel profiles for endless design flexibility
- May be installed horizontally and vertically
- Great option for Board & Batten look
- Symmetrical seams / batten design
- Complete line of matching trims & accessories
