

# PROPOSITION 65

## APPLICABLE TO MOLDED POLYSTYRENE PRODUCTS

Atlas Molded Products is committed to sustainability and providing transparent information to users of our products. The California Safe Drinking Water and Toxic Enforcement Act of 1986 ("Proposition 65" or "Prop 65") requires businesses to provide warnings to Californians about significant exposures to chemicals that cause cancer, birth defects or other reproductive harm. These chemicals can be in the products that Californians purchase, in their homes or workplaces, or those that are released into the environment. By requiring that this information be provided, Proposition 65 enables Californians to make informed decisions about their exposures to these chemicals.

The California Office of Environmental Health Hazard Assessment (OEHHA) has established a No Significant Risk Limit (NSRL) for a single chemical in molded expanded polystyrene. Molded polystyrene does not require a warning for this chemical as exposure for the listed chemical is low enough to pose no significant risk of cancer and is significantly below levels observed to cause birth defects or other reproductive harm.
